JAZZ

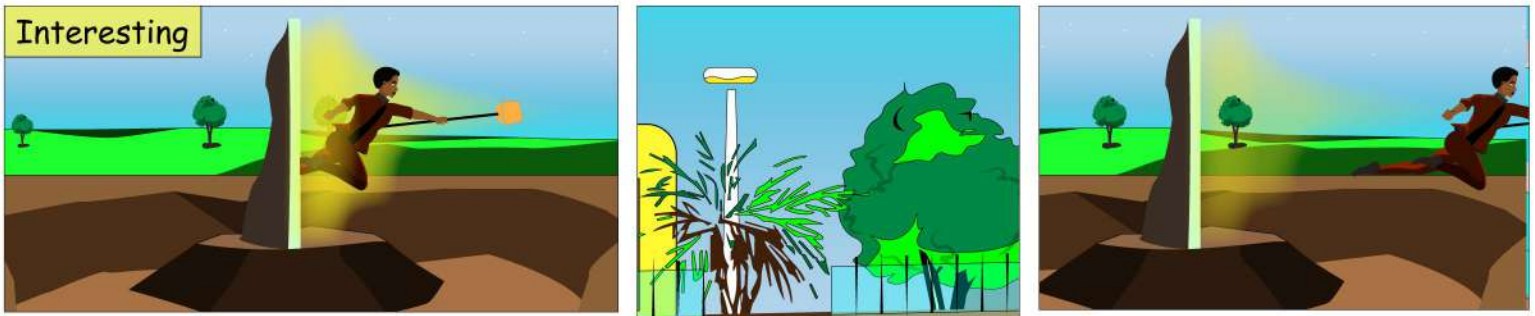

Uninvited Guests

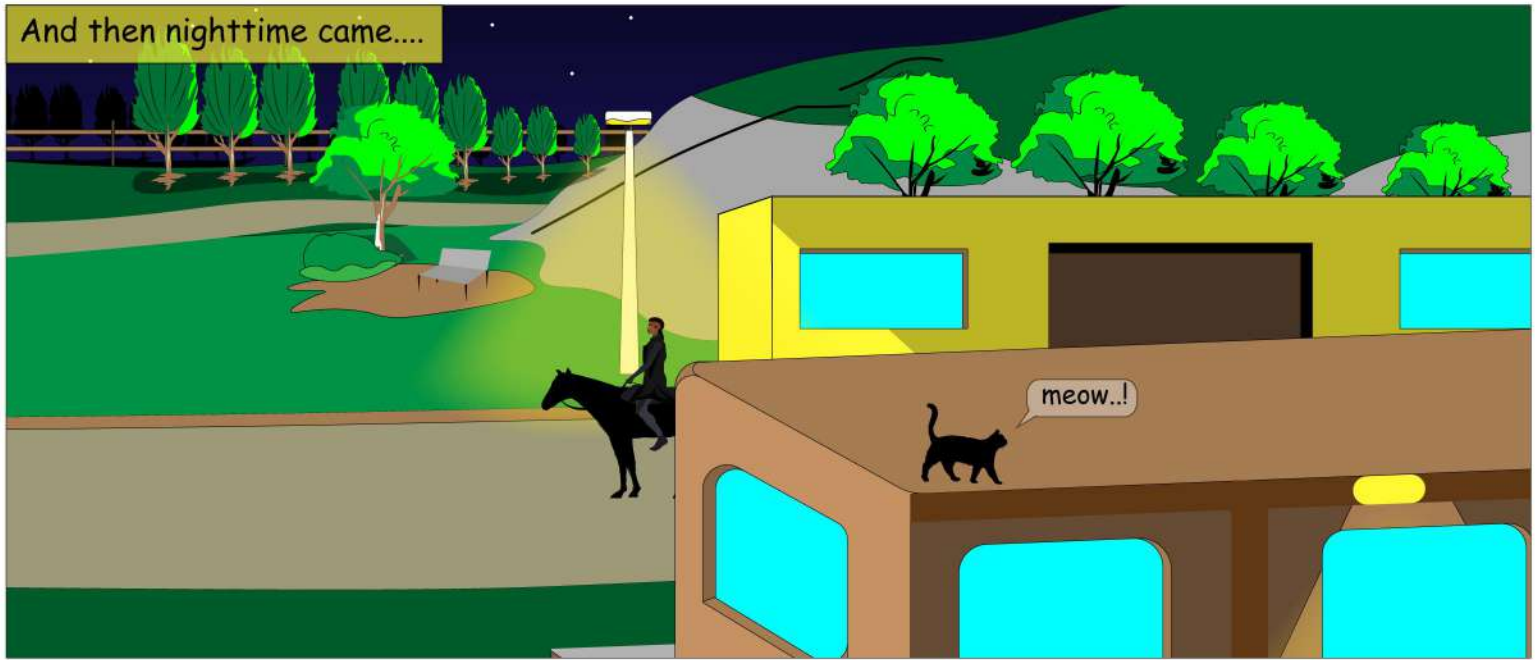

Quiet scenes at the estate

Interesting

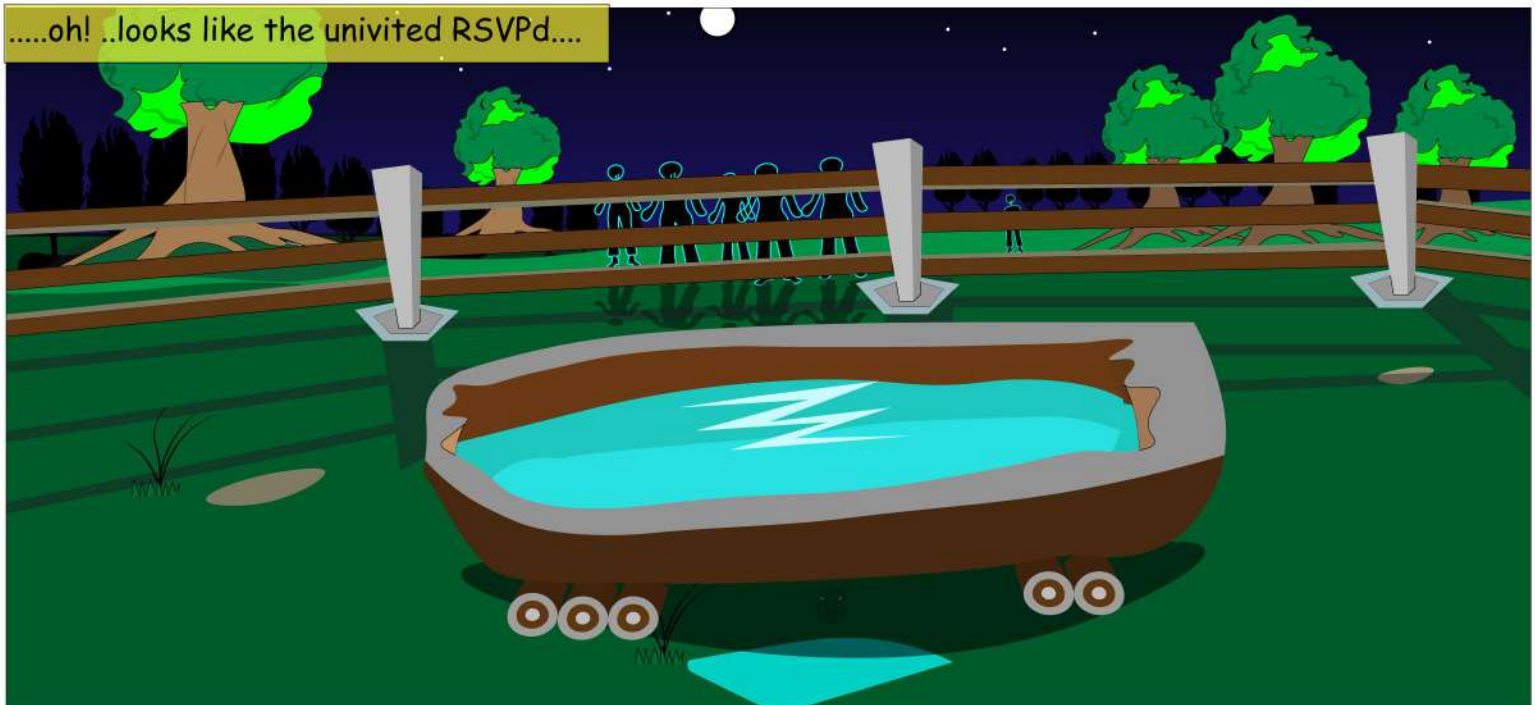

And then nighttime came....

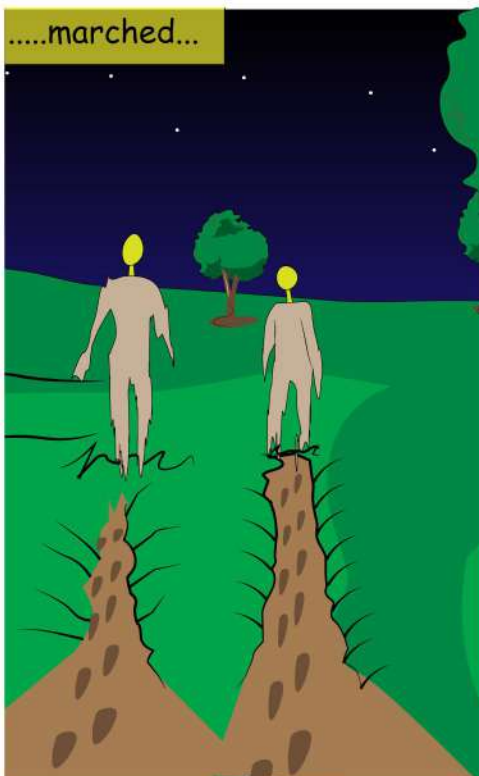

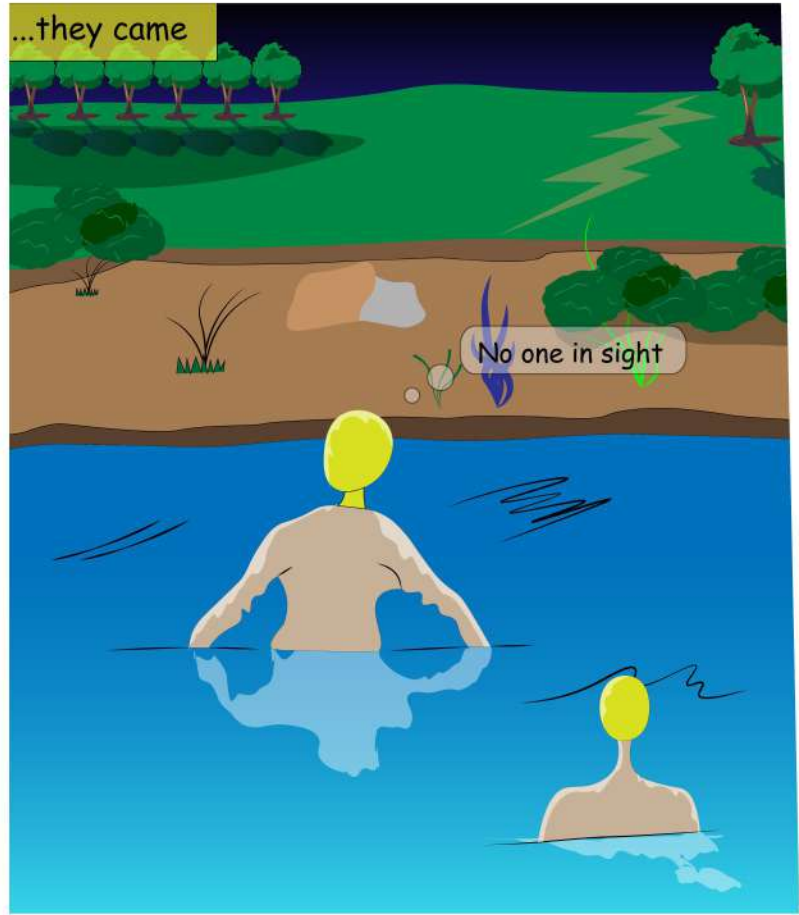

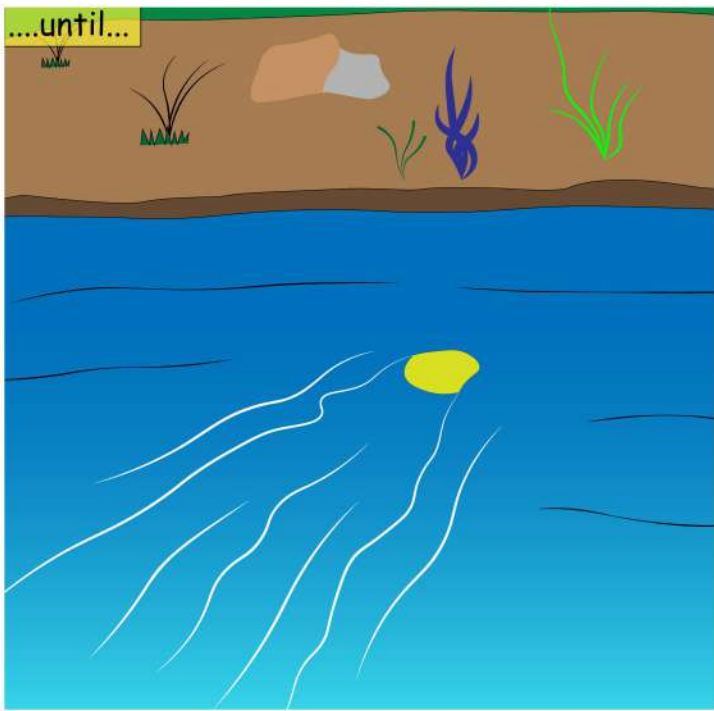

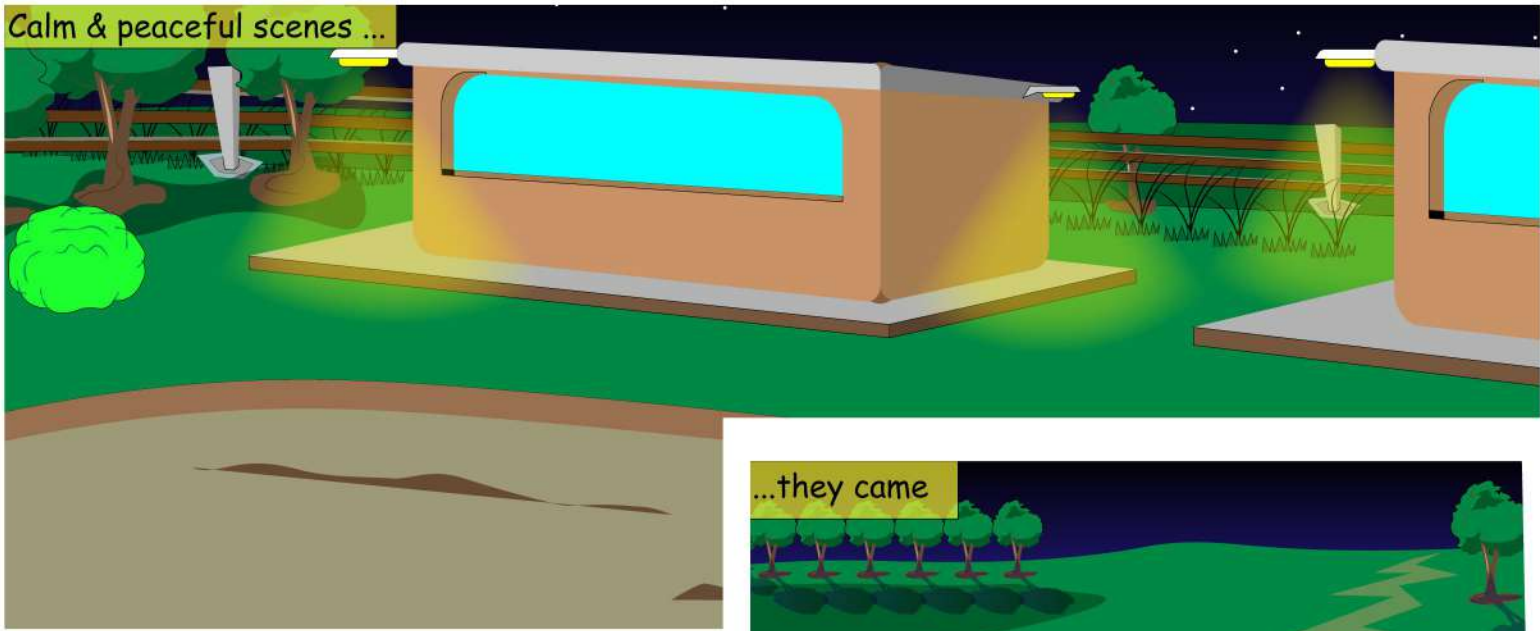

This will do

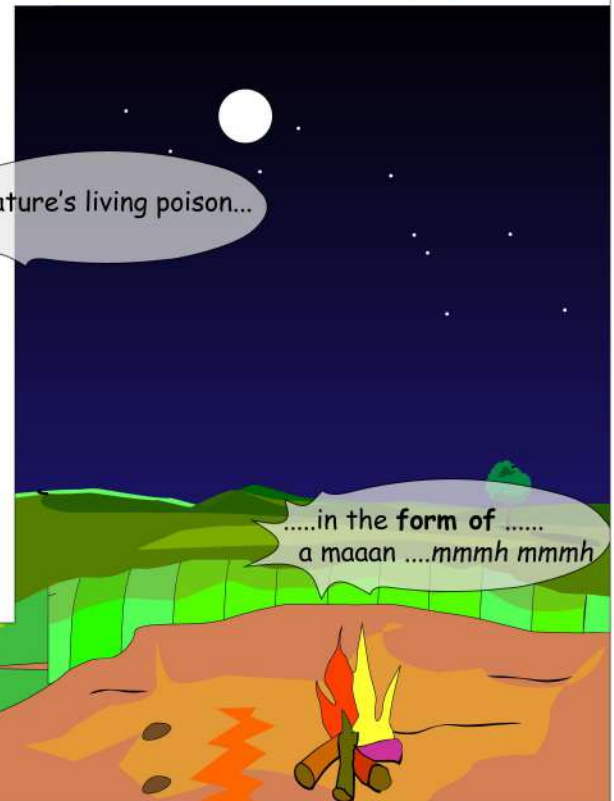

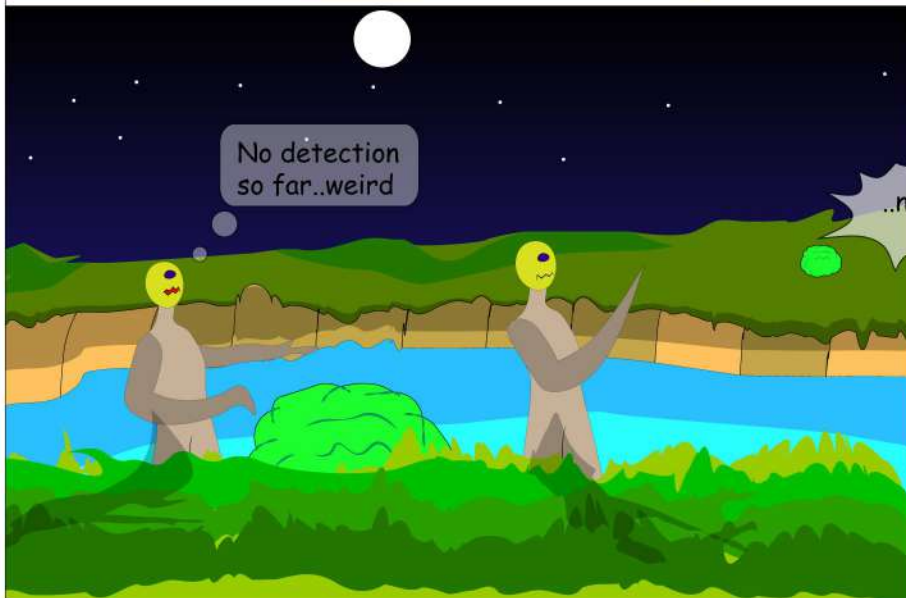

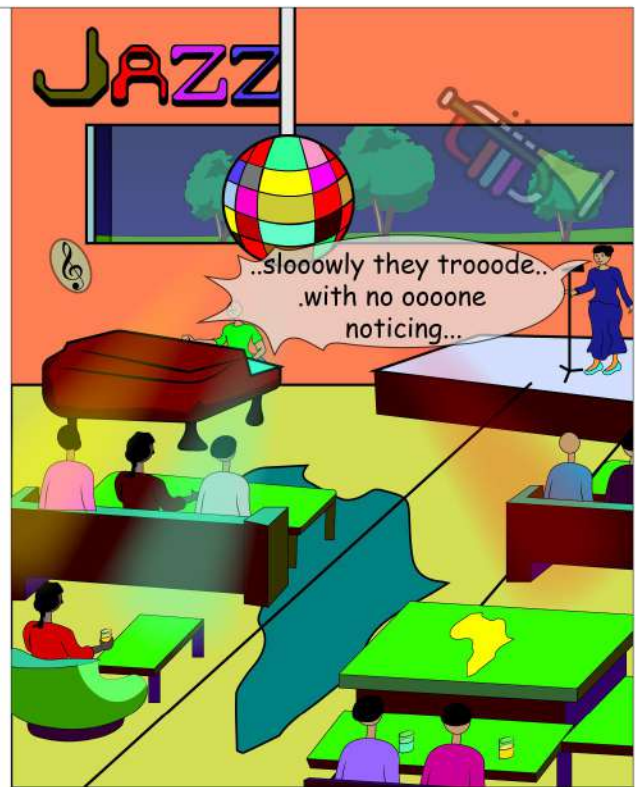

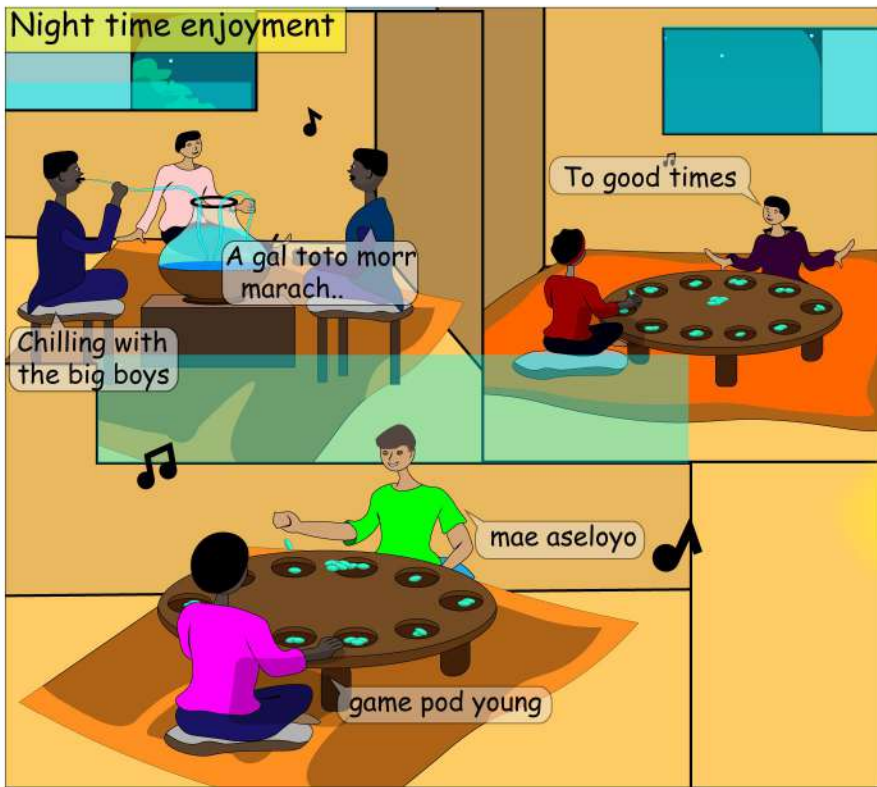

.....oh! ..looks like the univited RSVPd....

Calm & peaceful scenes ...

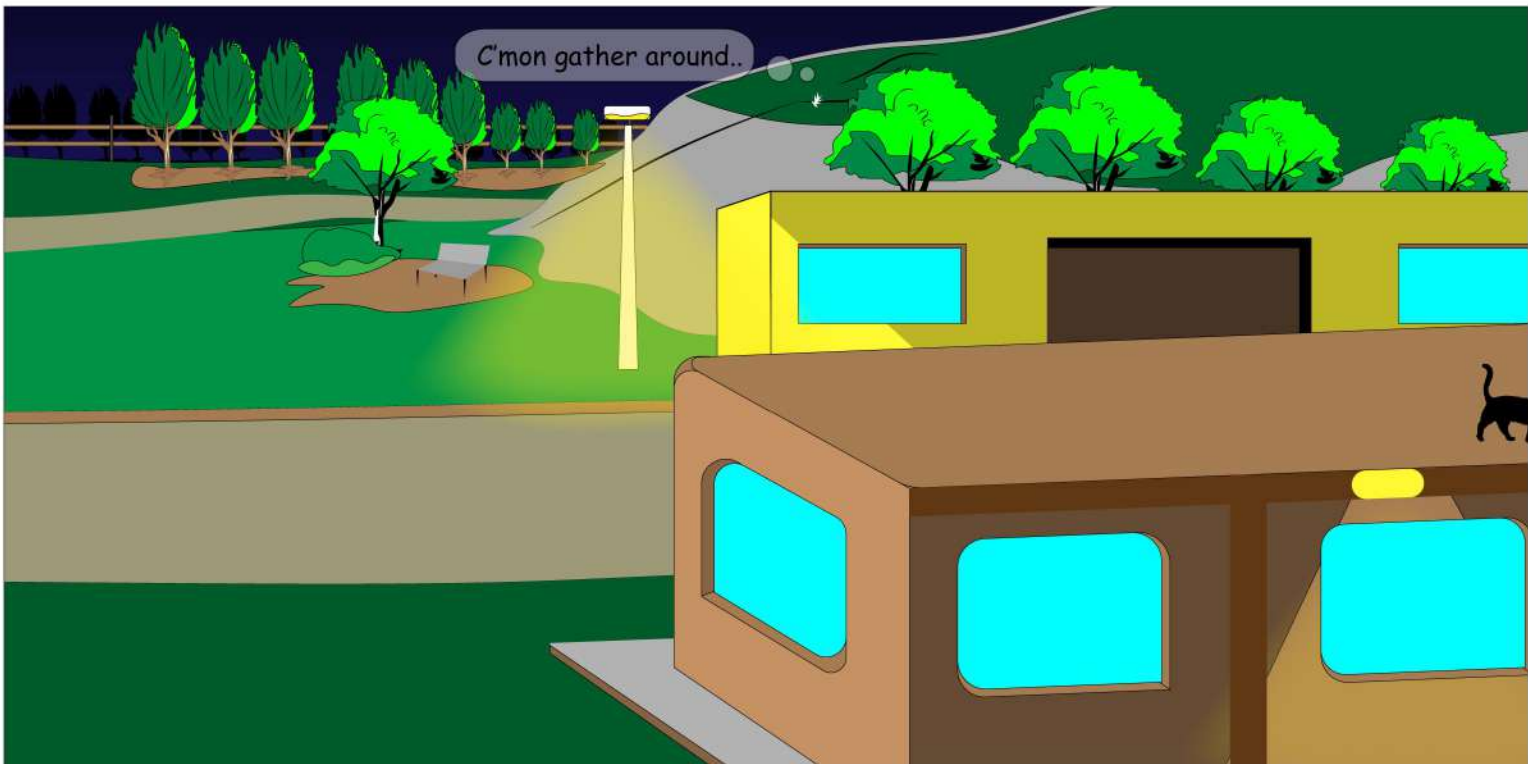

Night time enjoyment

...the silent hoarde....

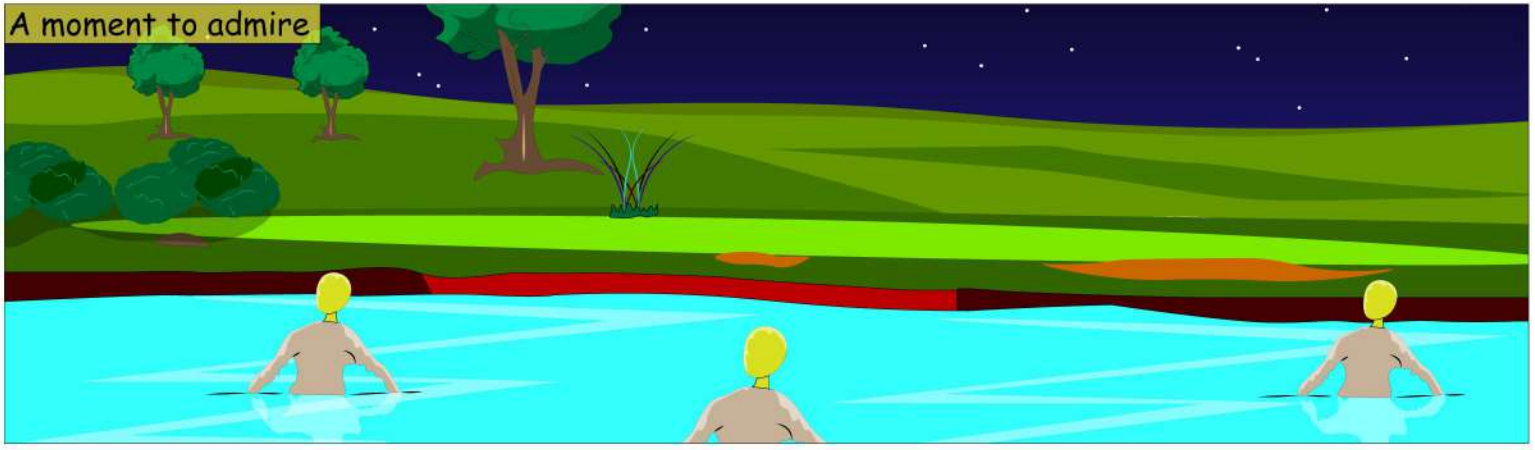

C'mon gather around..

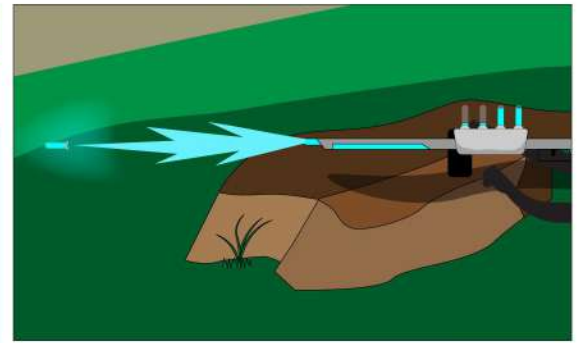

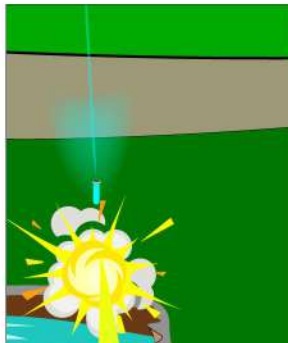

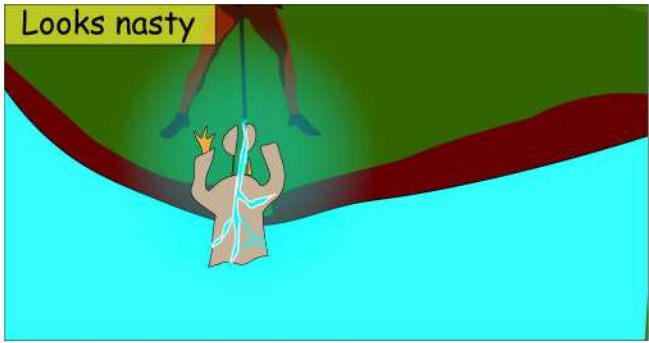

Scoping point

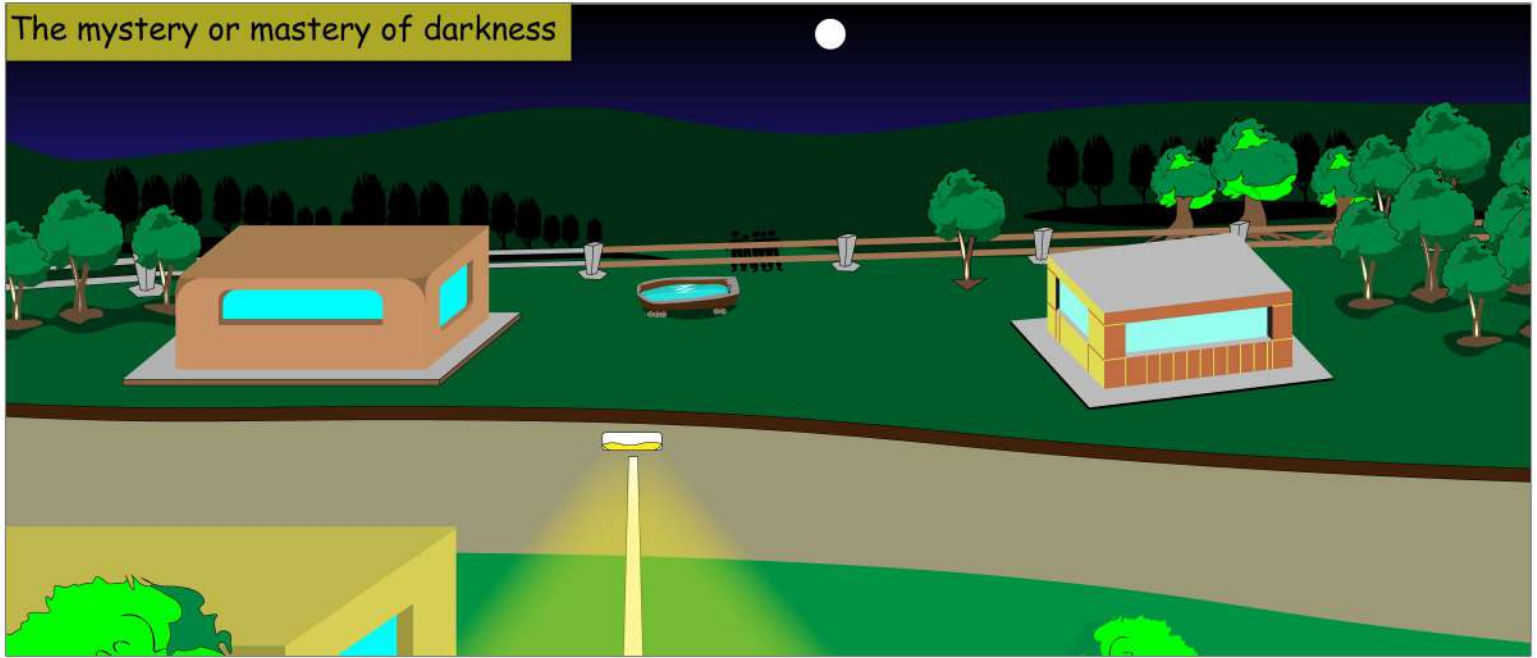

A moment to admire

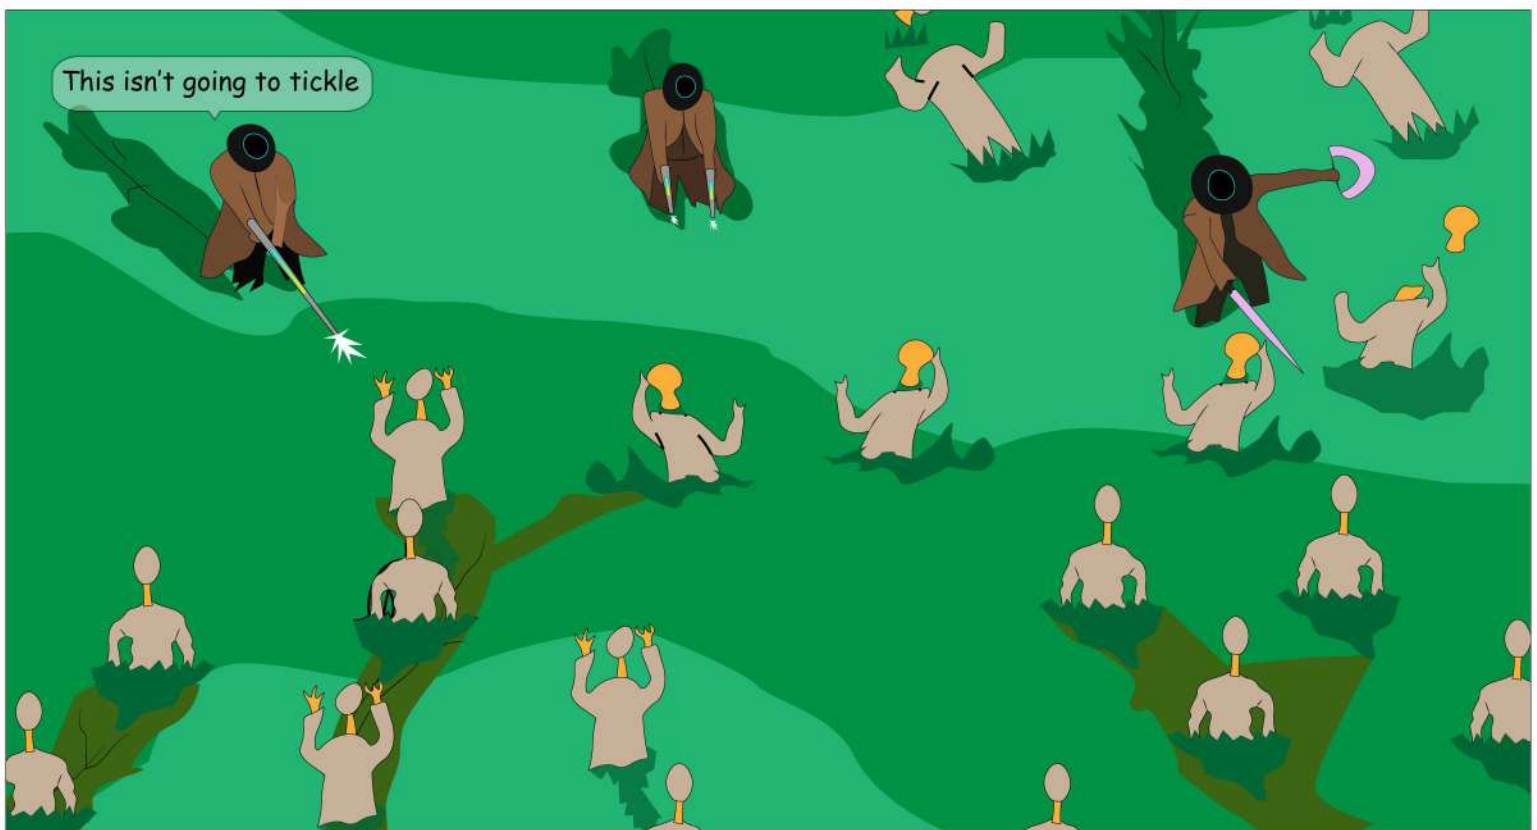

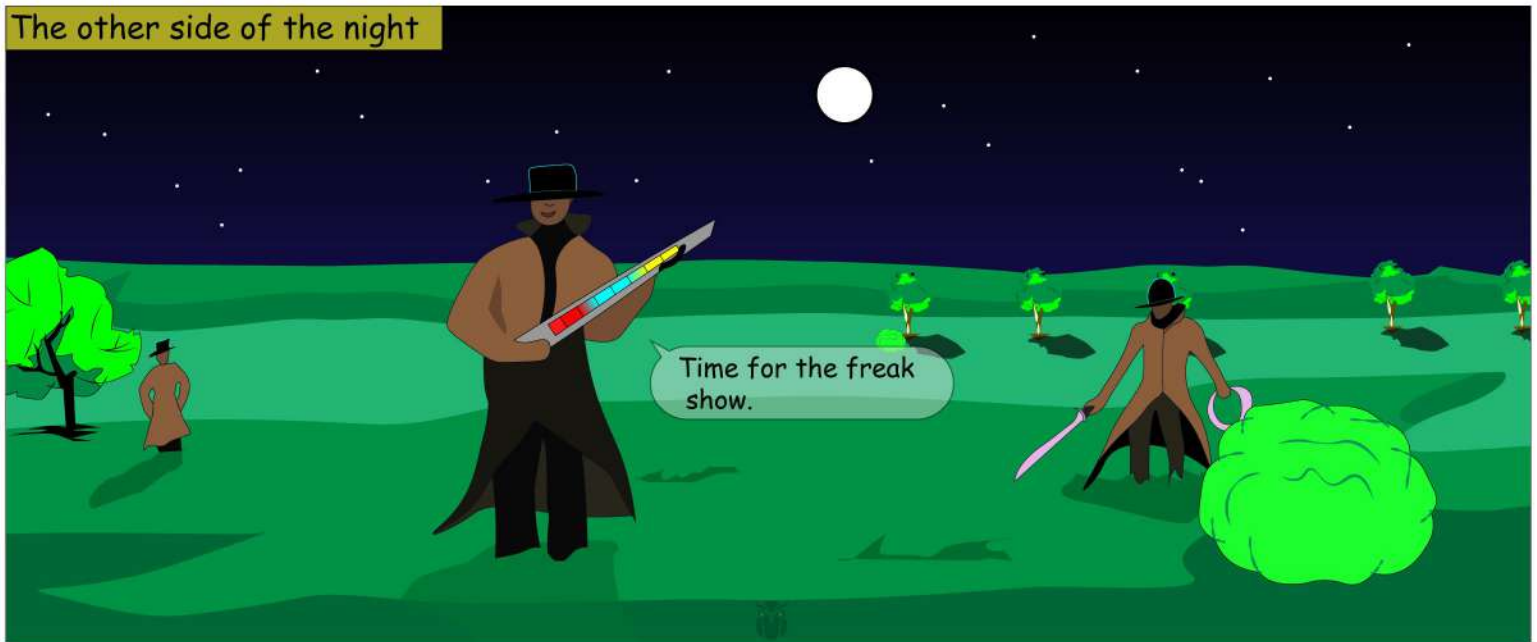

Looks nasty

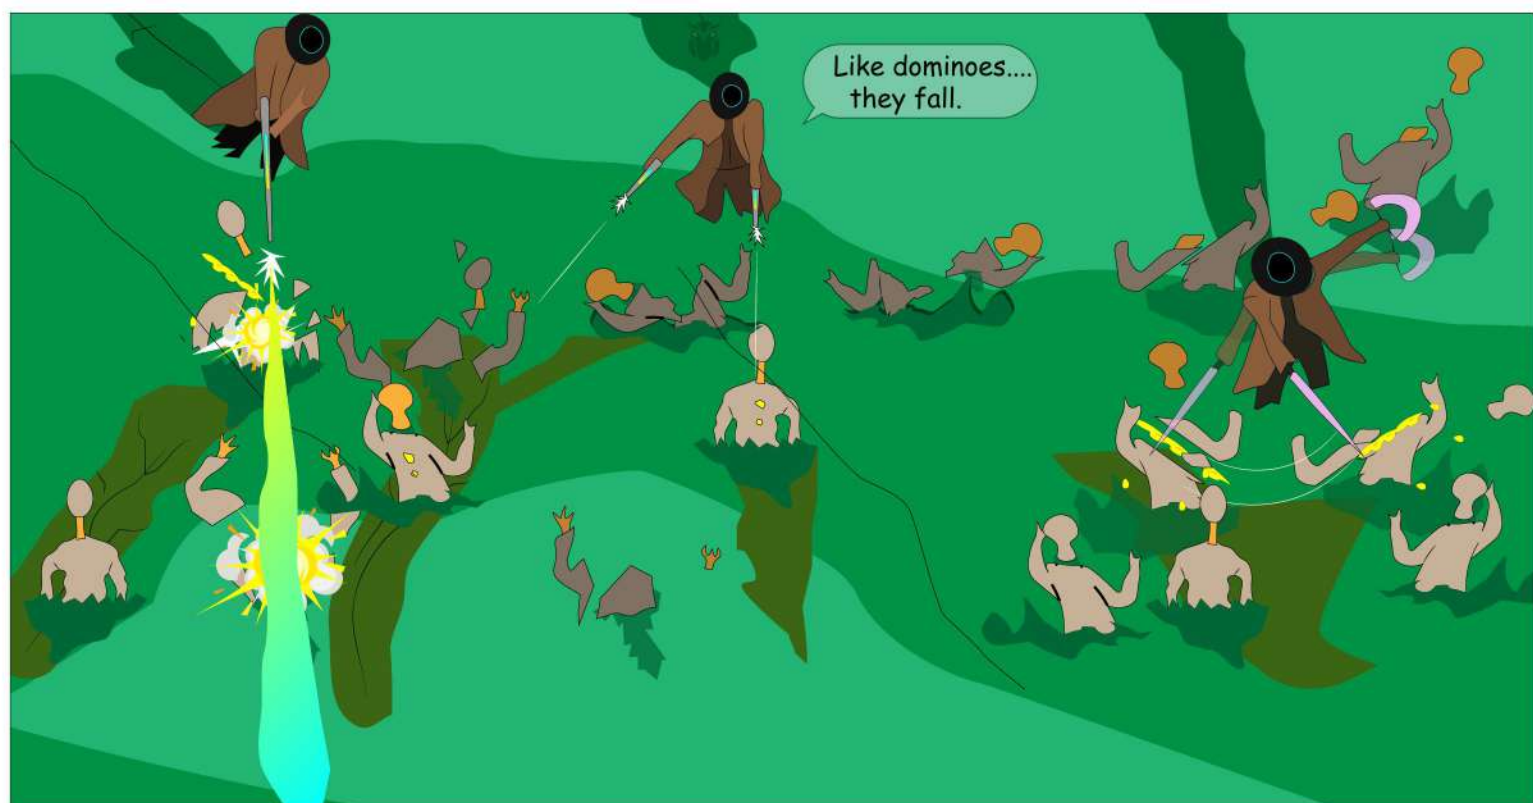

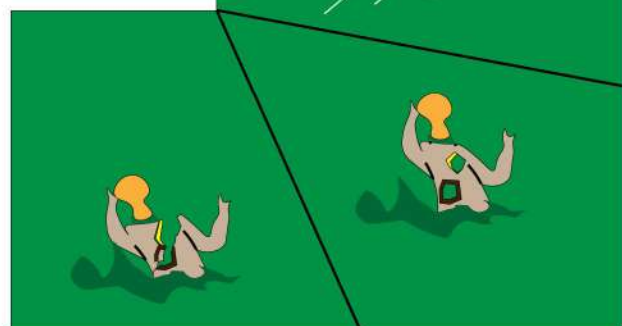

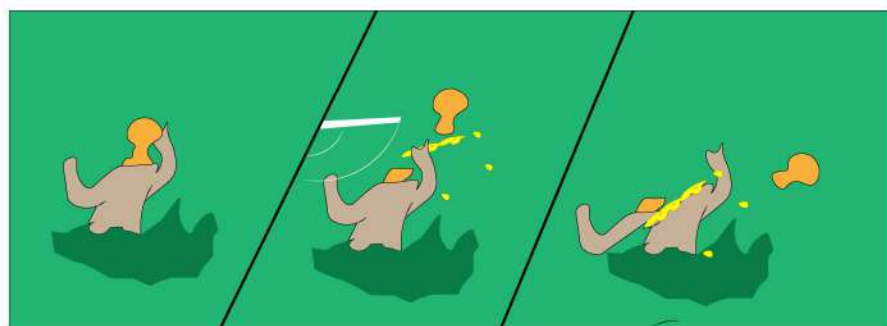

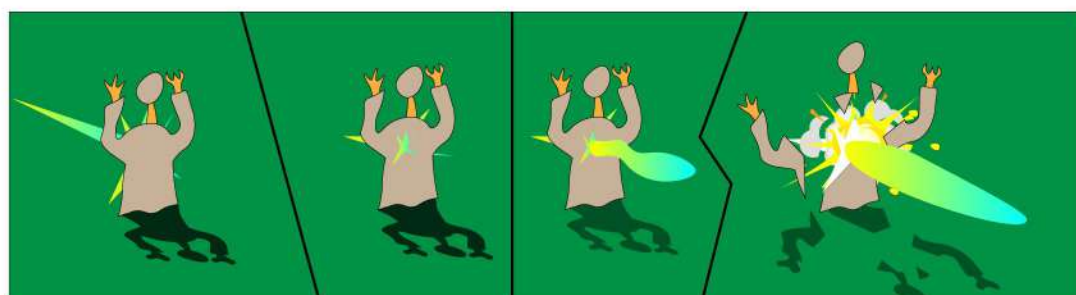

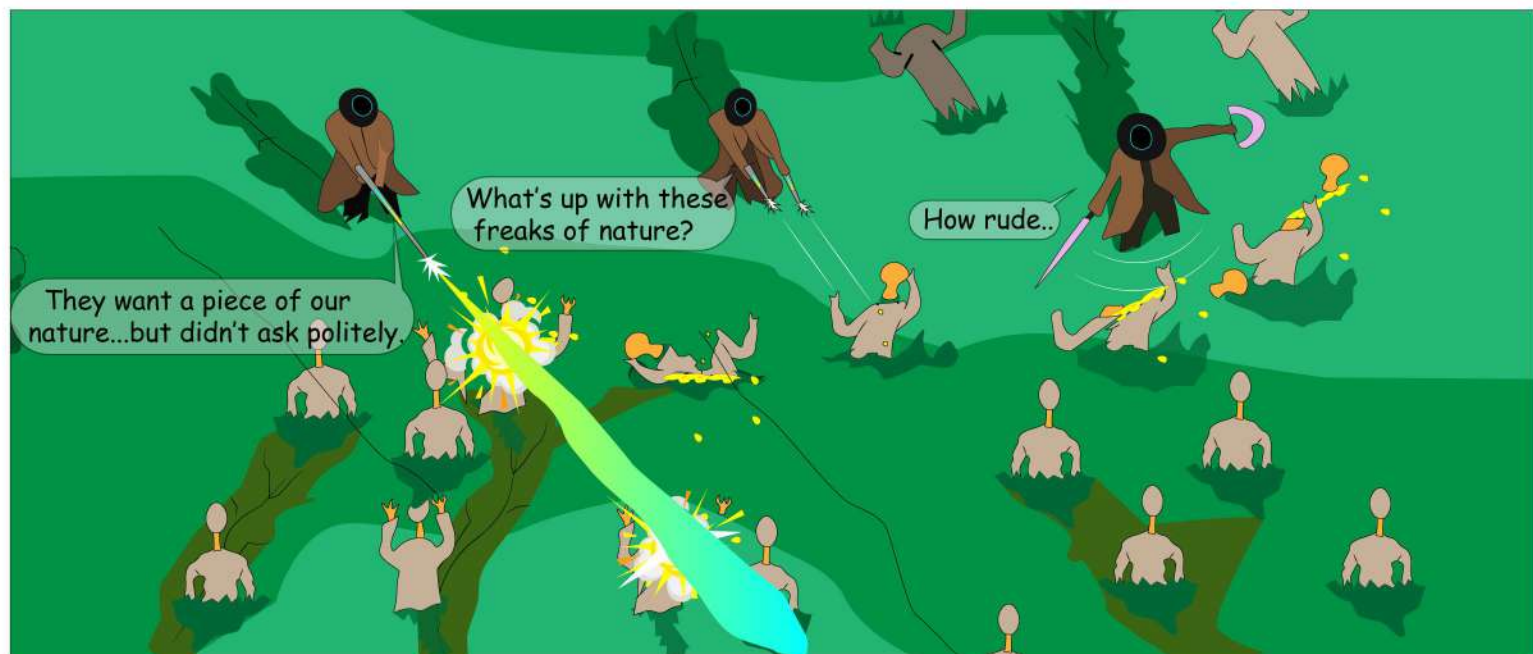

The mystery or mastery of darkness

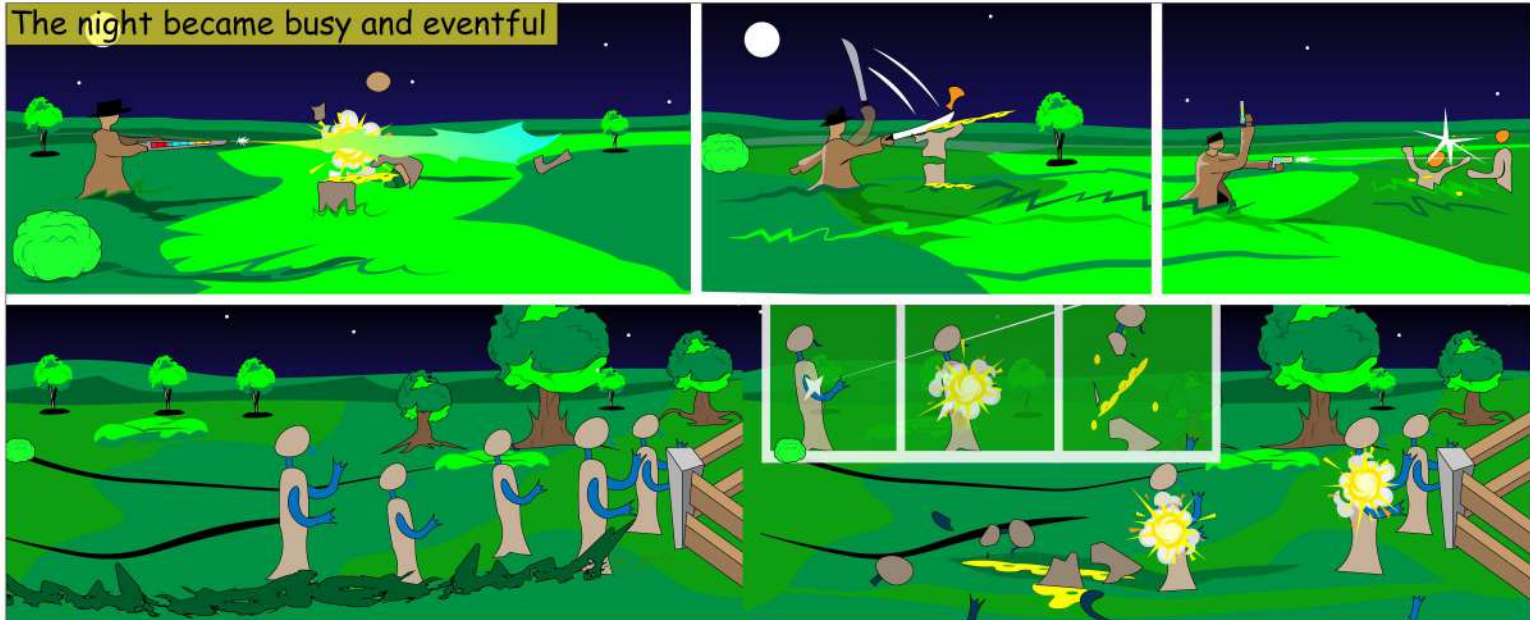

The other side of the night

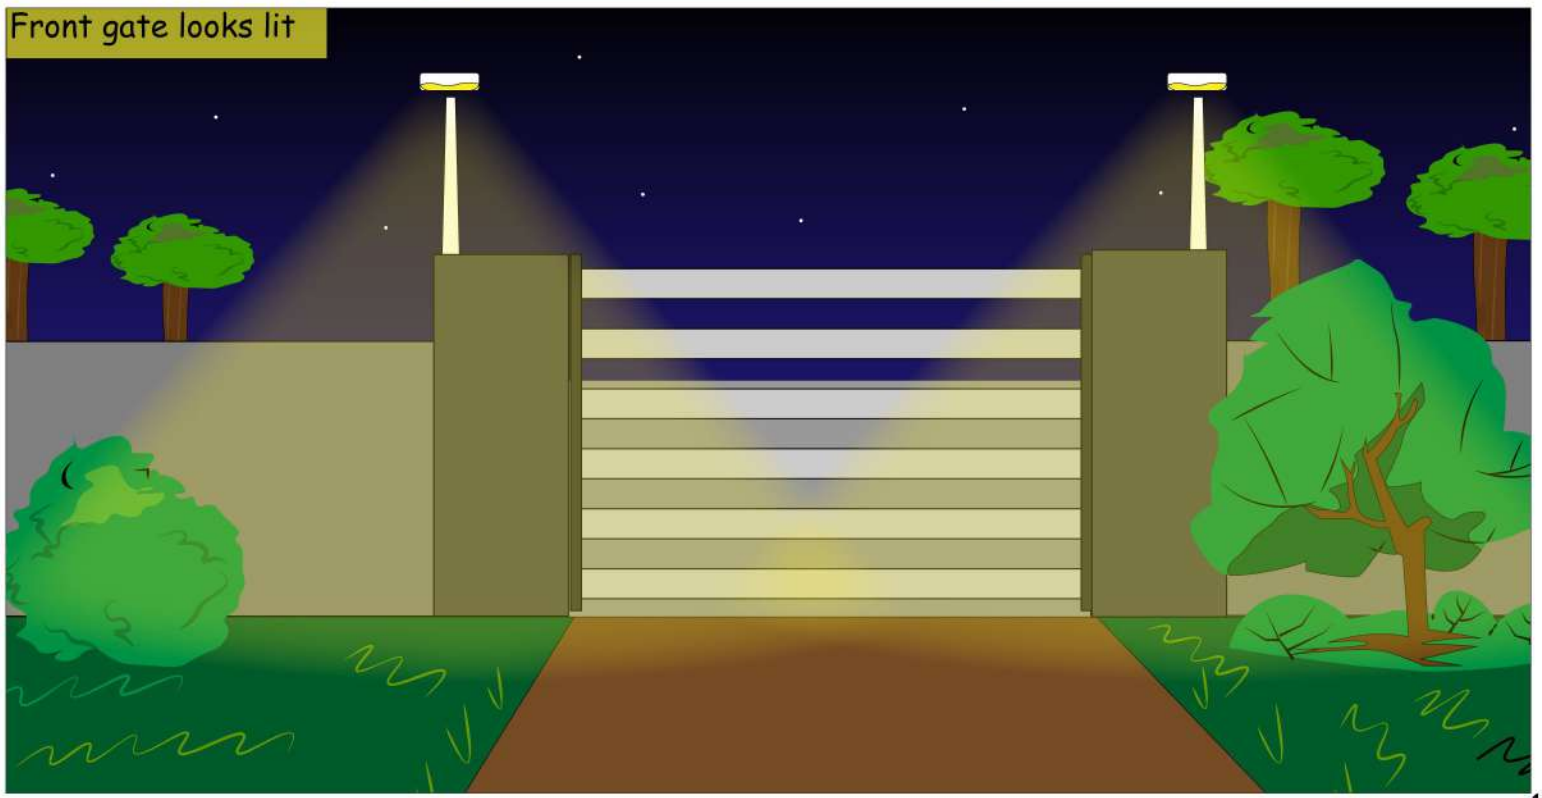

The night became busy and eventful

The forest

Front gate looks lit

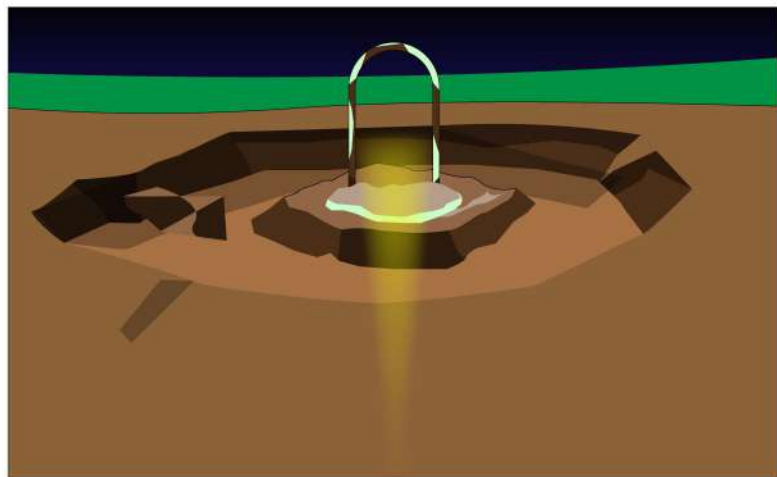

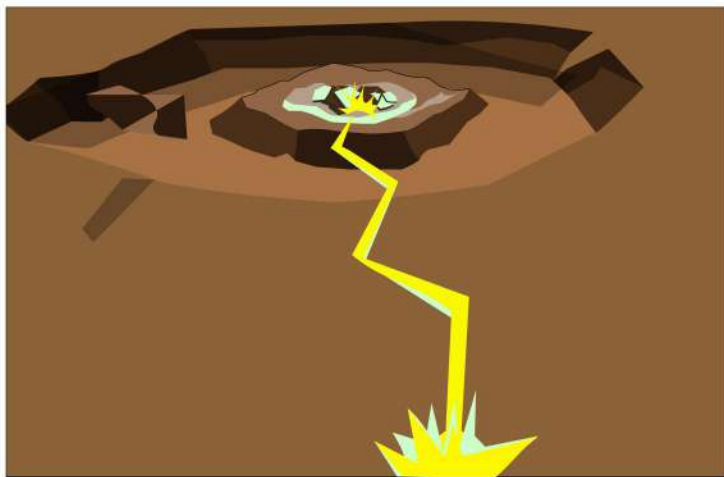

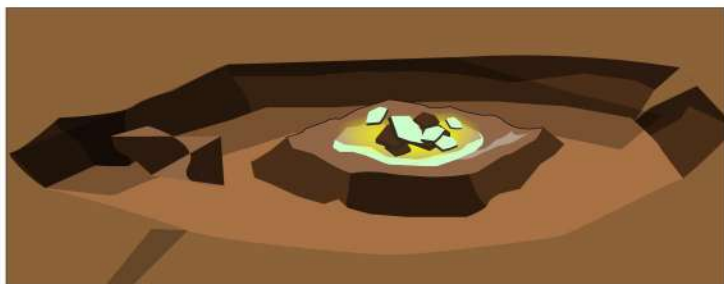

Bonfire talks

And then it was calm ..once again...

HELP!!

ISSUE
#11.

Bugs' World

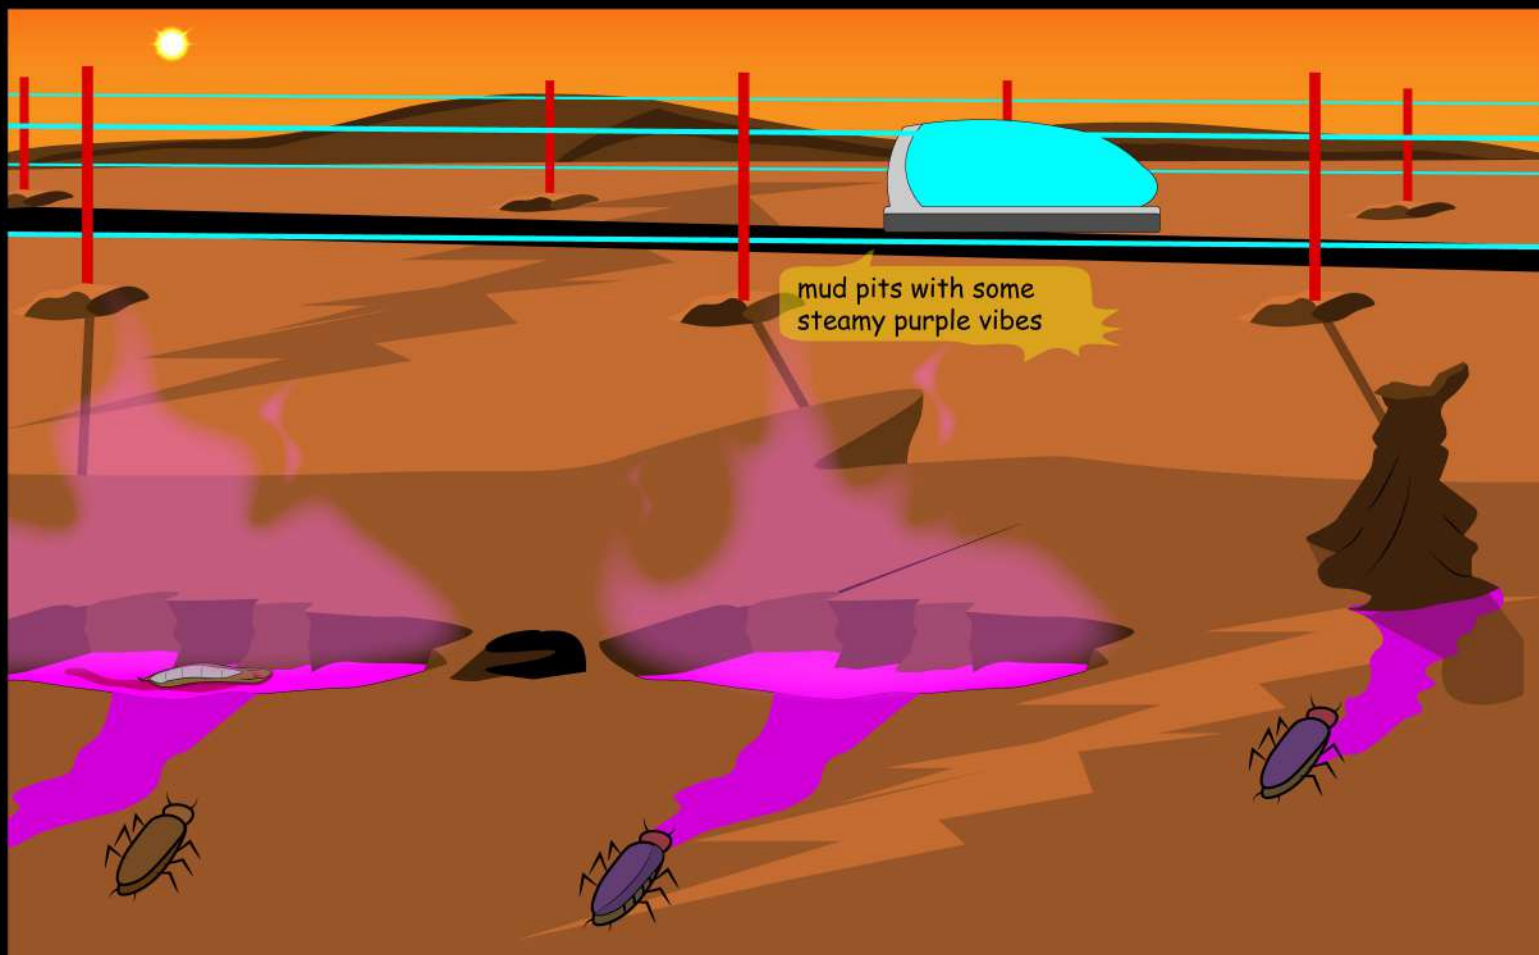

This place is weird

Explain.

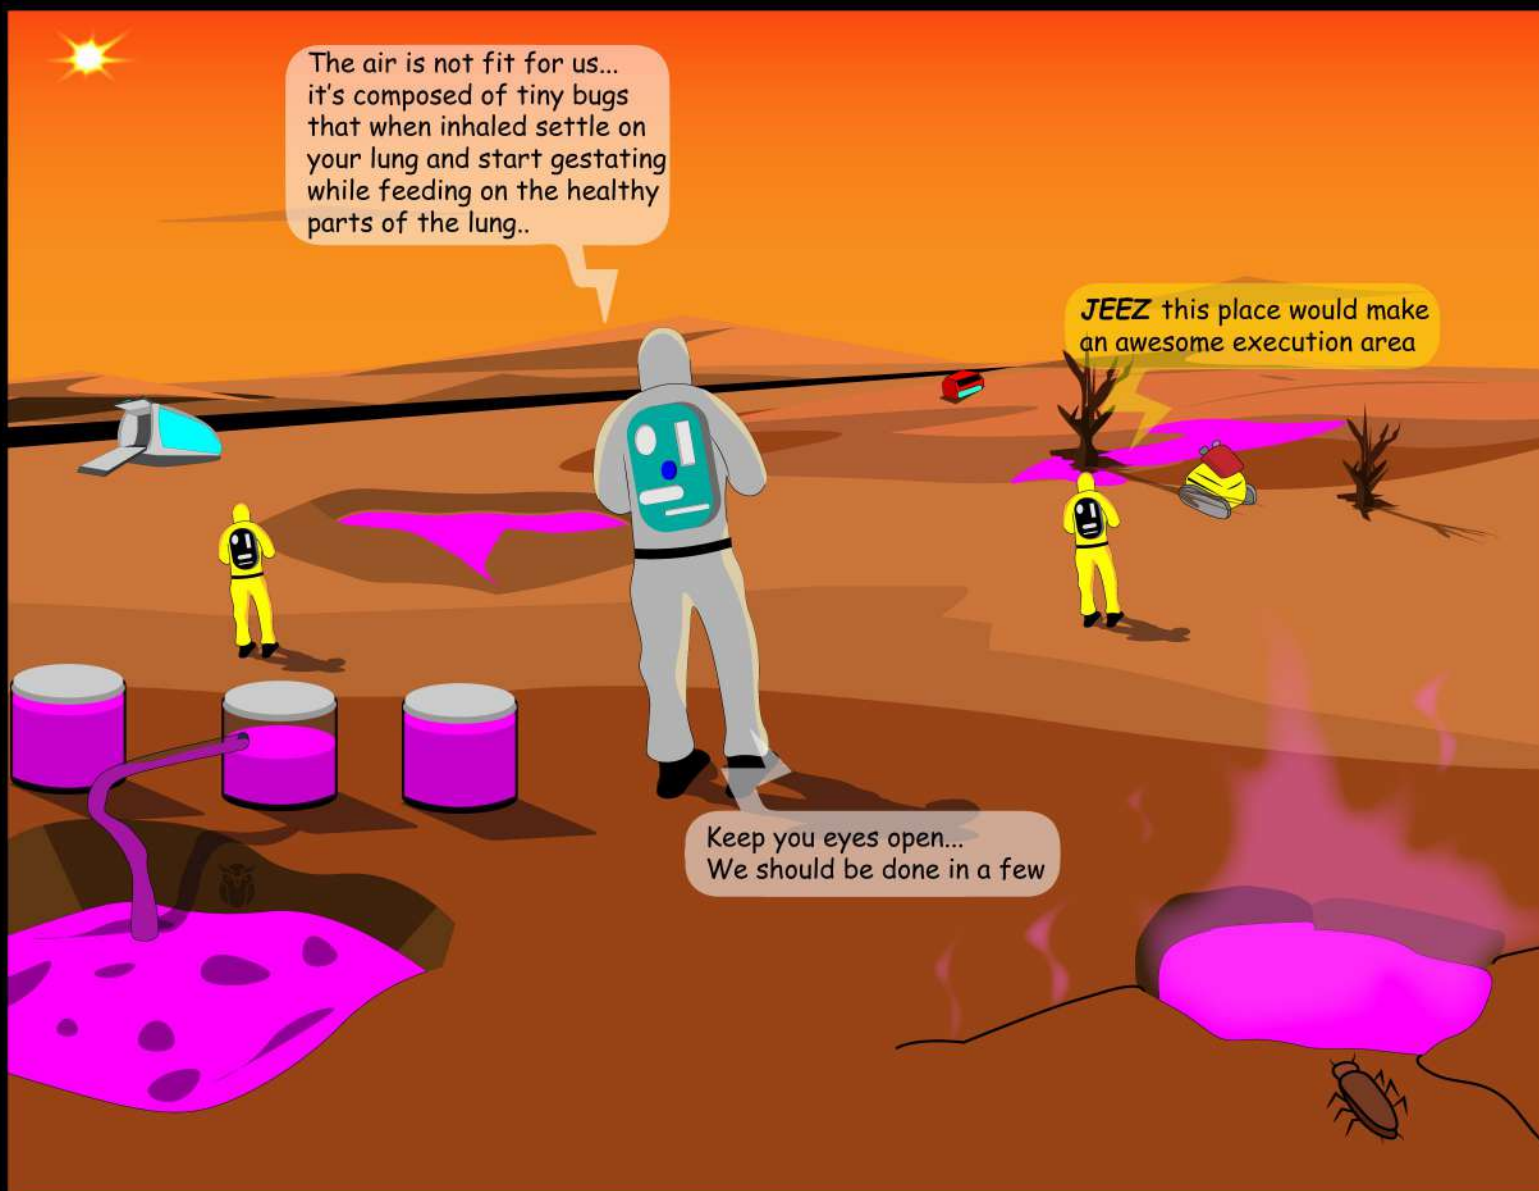

crazy weather...weird bugs..
close to zero plant life...

...a pleasant scenery riddled
with mystery in summary.

Everything has its' pros and
cons but on this land the
cons outweigh the pros

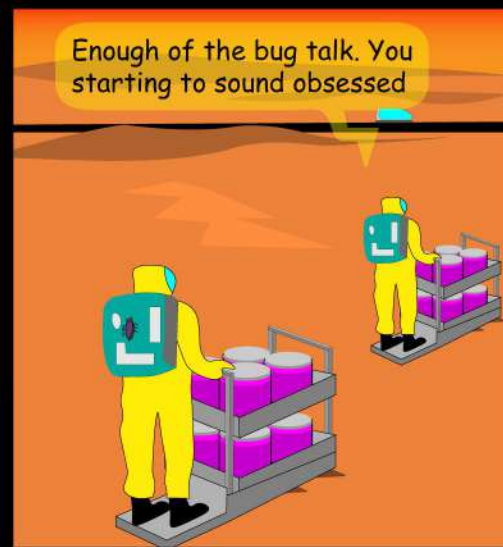

mud pits with some
steamy purple vibes

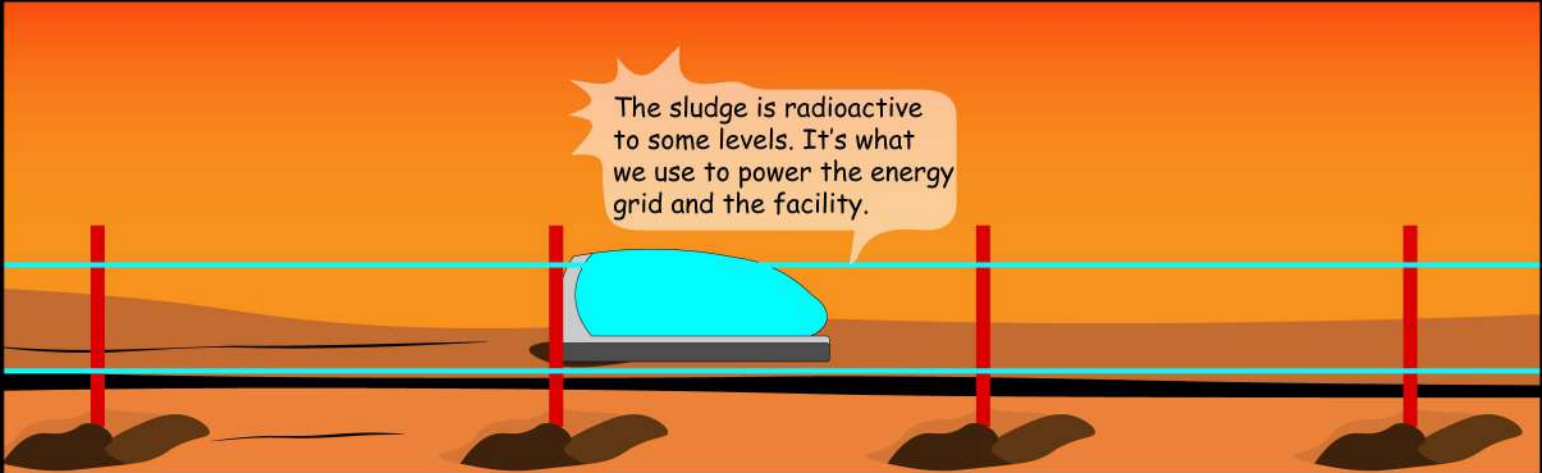

The air is not fit for us...
it's composed of tiny bugs
that when inhaled settle on
your lung and start gestating
while feeding on the healthy
parts of the lung..

JEEZ this place would make
an awesome execution area

Keep you eyes open...
We should be done in a few

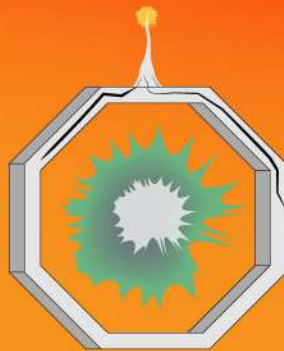

The sludge is radioactive to some levels. It's what we use to power the energy grid and the facility.

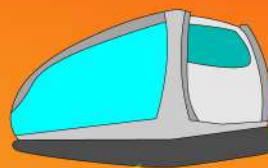

Wasn't there a team handling a research on the nature of the bugs and their threat capability.?

Yeah.
It's in one of the other facilities.

Hex-a-rtal

Approaching the gate-way..
Hold on tight.

I hate to leave the fields.

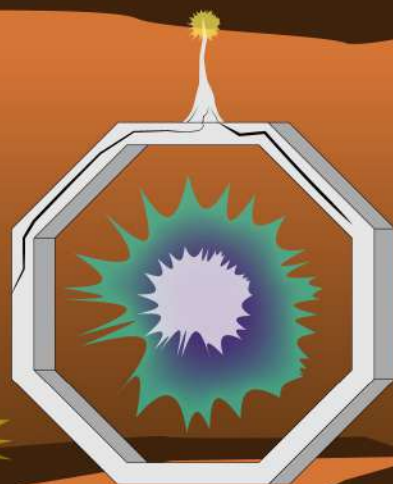

The Caves

And into the caves. Any
queries so far?

Why the Hex-a-rtal gate?

Well it's faster than flying
to the lab on the surface.

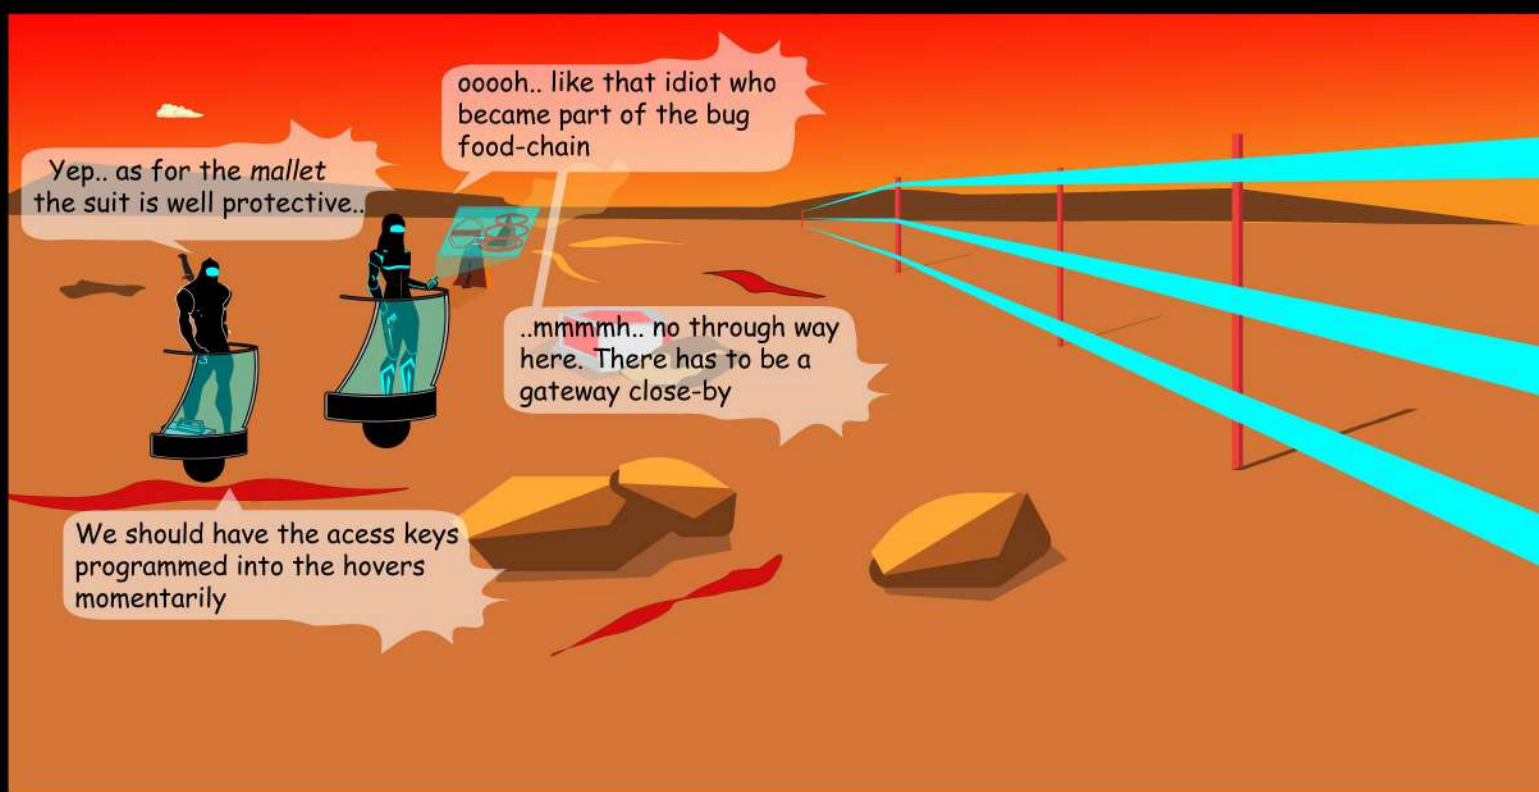

There are guests expected
in a few hours time.

Friendlyies or hostiles?

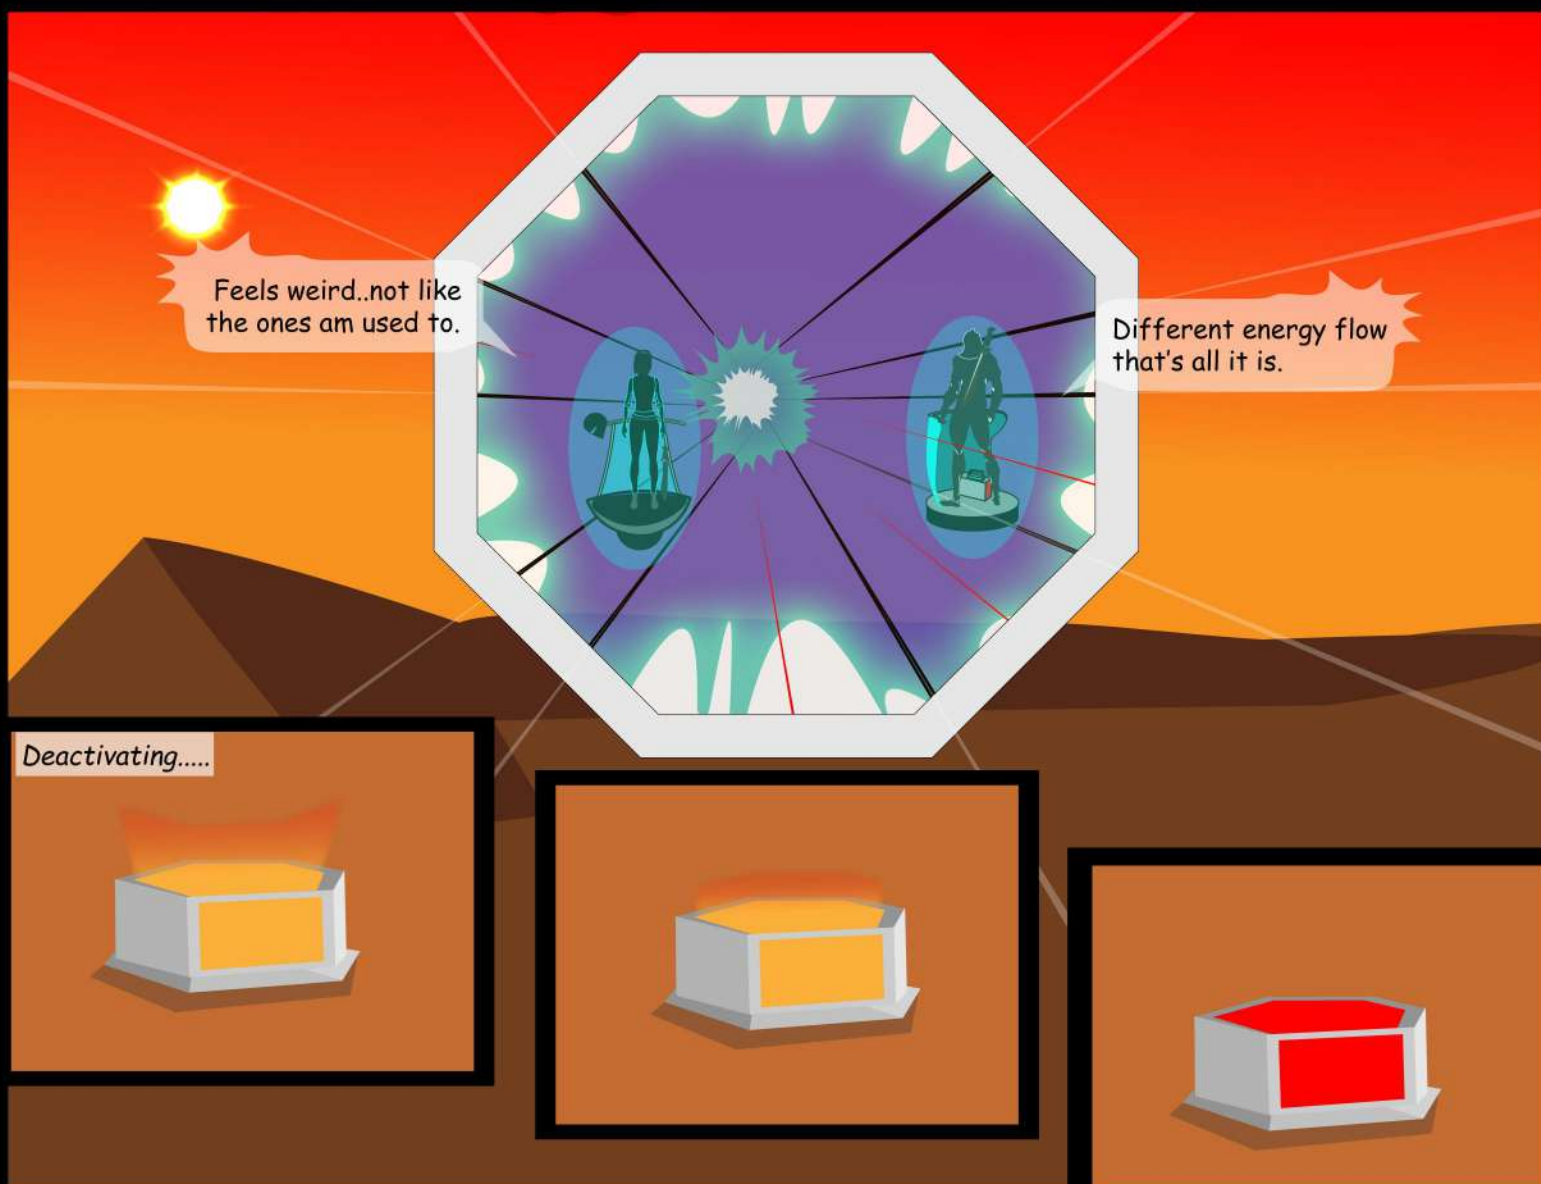

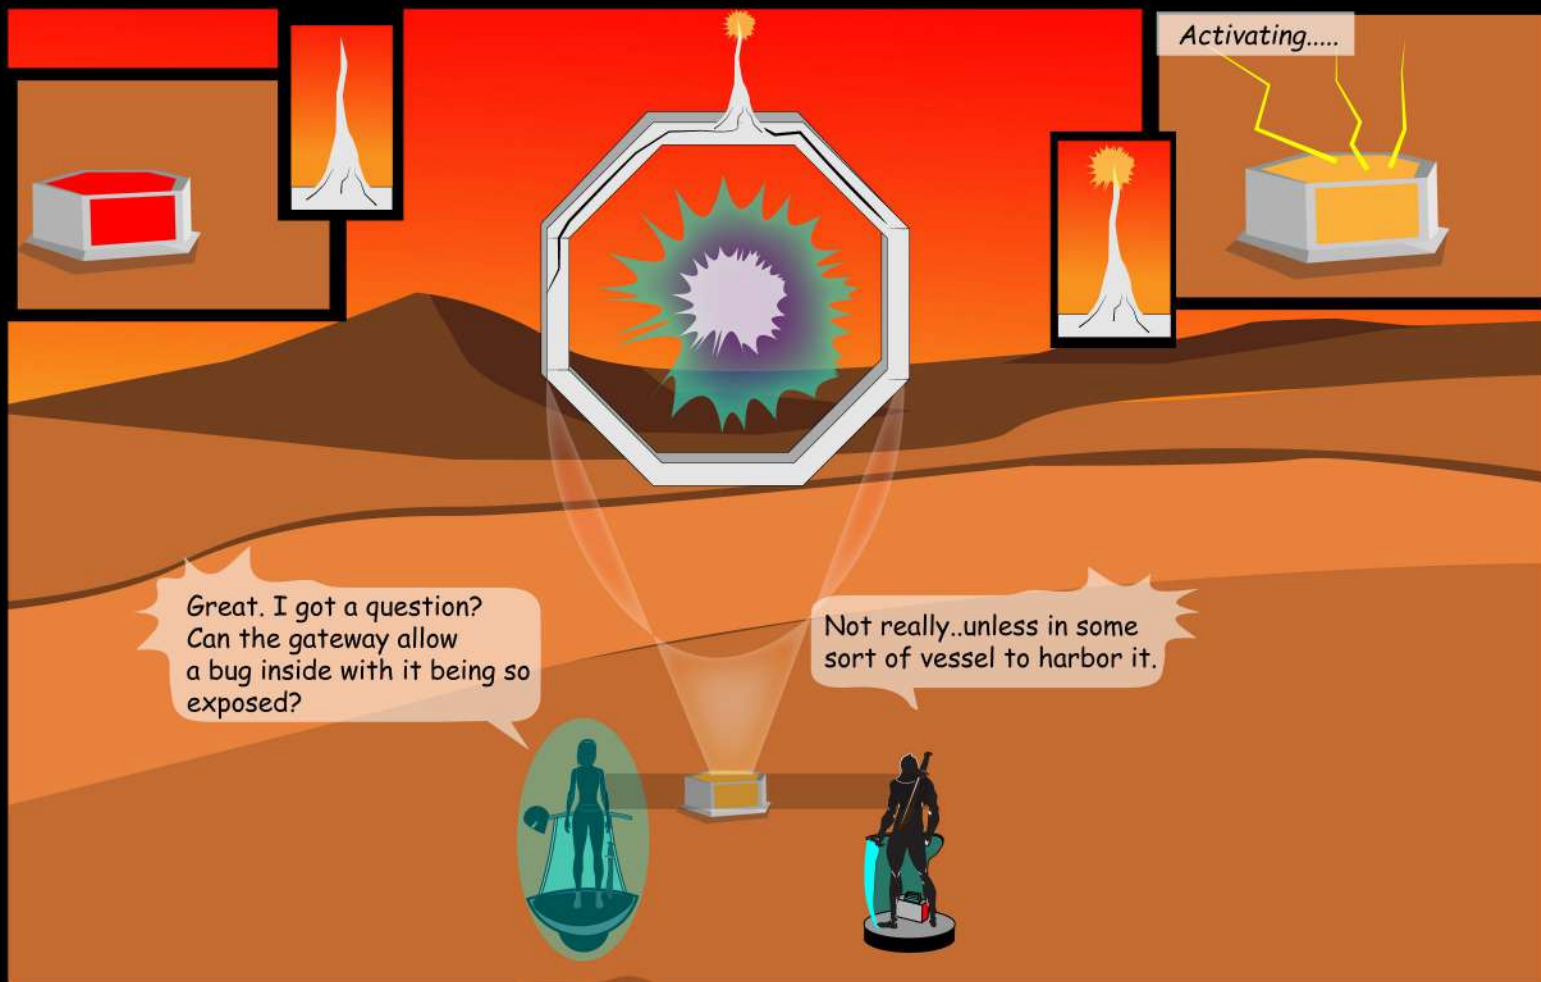

More like potential allies

Moments later

The unlucky one

EMERGENCY!

Unauthorized portal
access detected!

You think we can take
them out?

You don't stand a chance

Your boss is expecting
us.

That's hard to believe
with the unauthorized
hex-a-rtal use

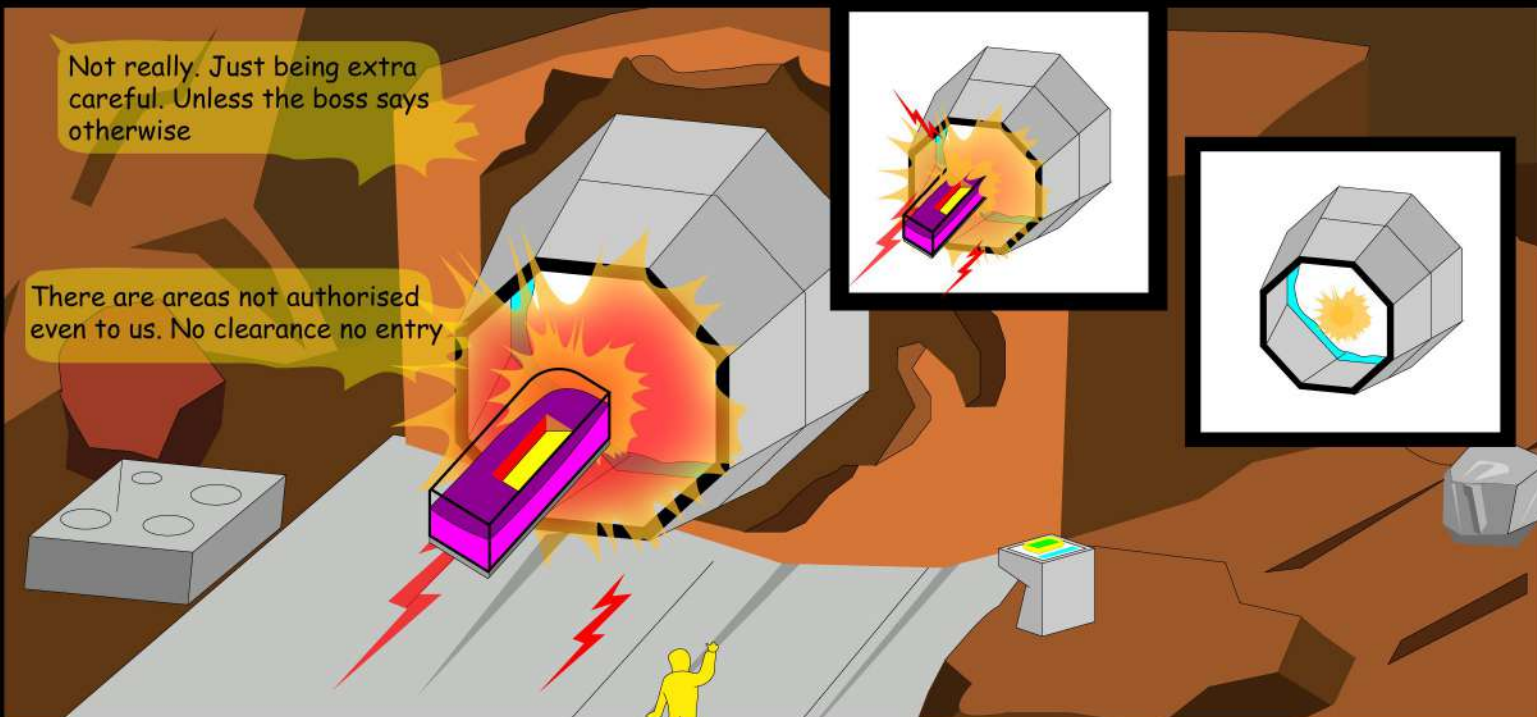

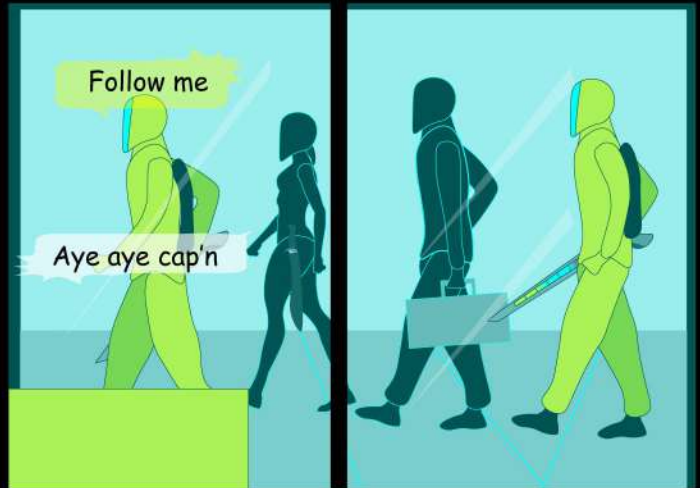

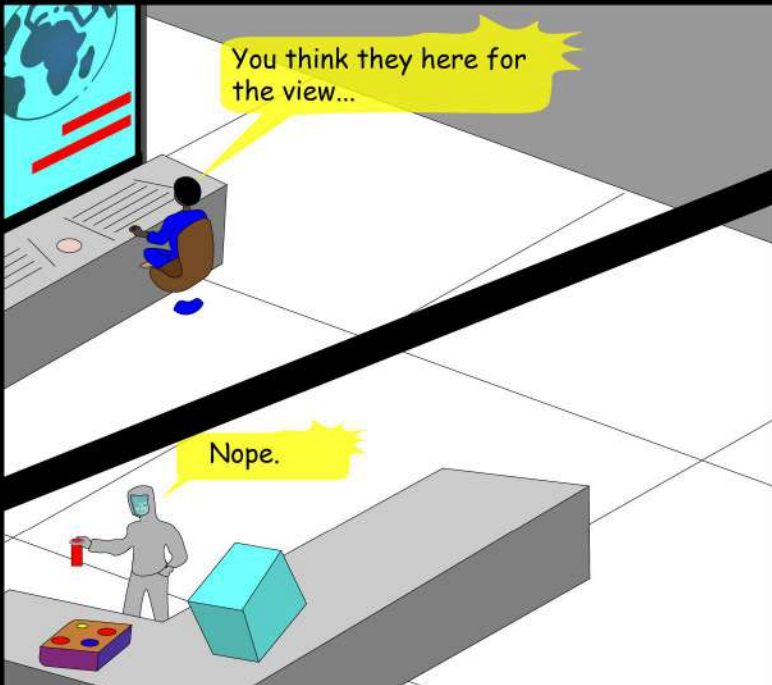

Show me the front
door and I'll knock.

Are they cleared?

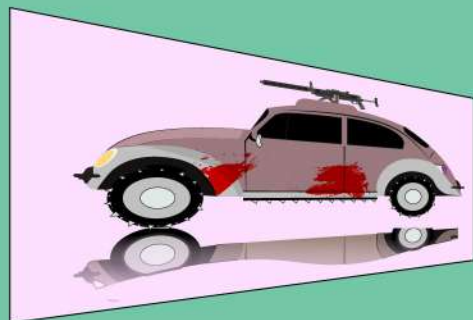

Follow me

Aye aye cap'n

Yeah. Let them
through.

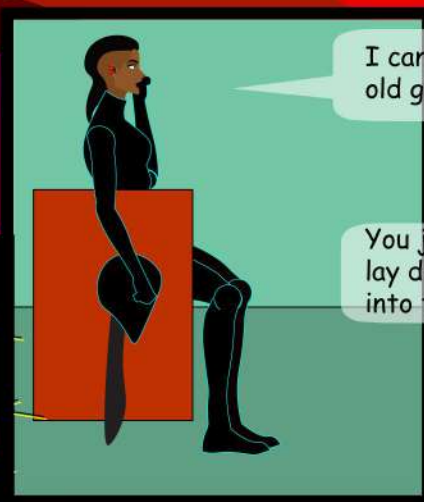

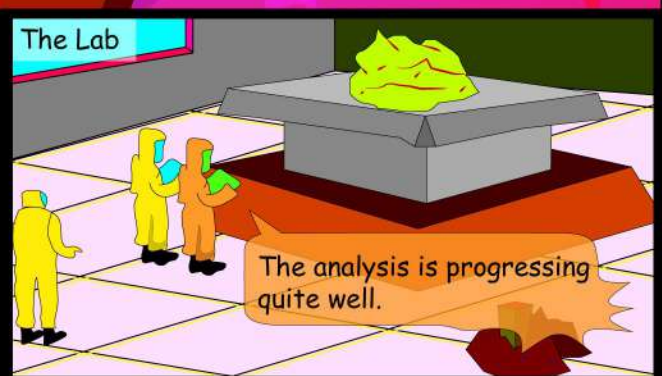

The office

Offline

The Lab

JEEZ !! those bugs are brutal

You really sure she's okay here?

Affirmative. Don't underestimate her. She has her own level of chaos

Yeah better remain cloaked

We getting close...I can feel it

There it is

Awesome. What's your plan?

First..summoning the hammer

...mmnnnnh.....humnnnn.....

This should be interesting

Now for the portal to Nyef..

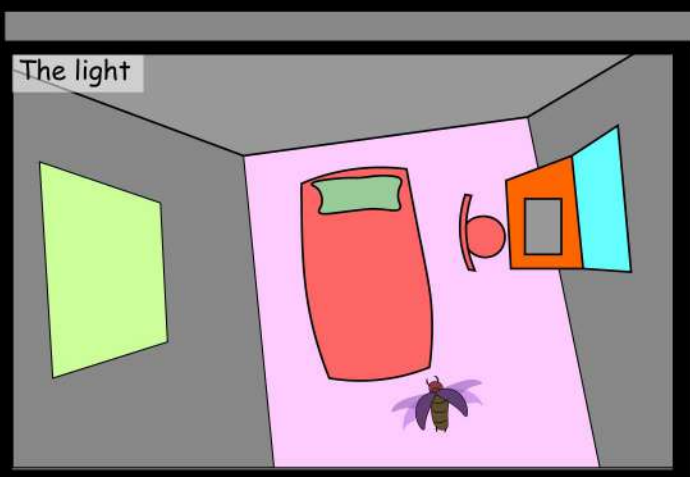

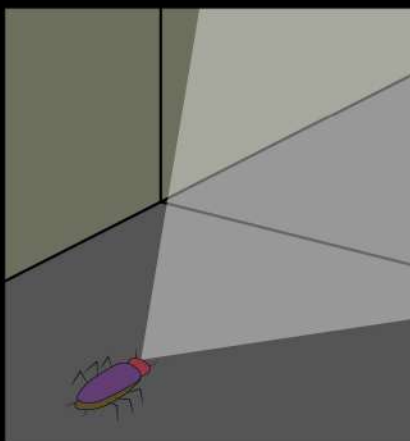

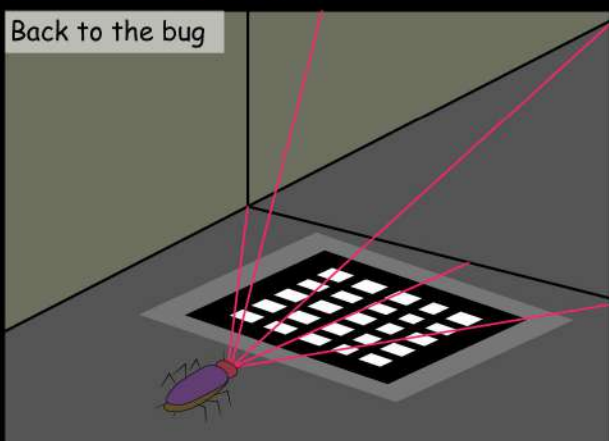

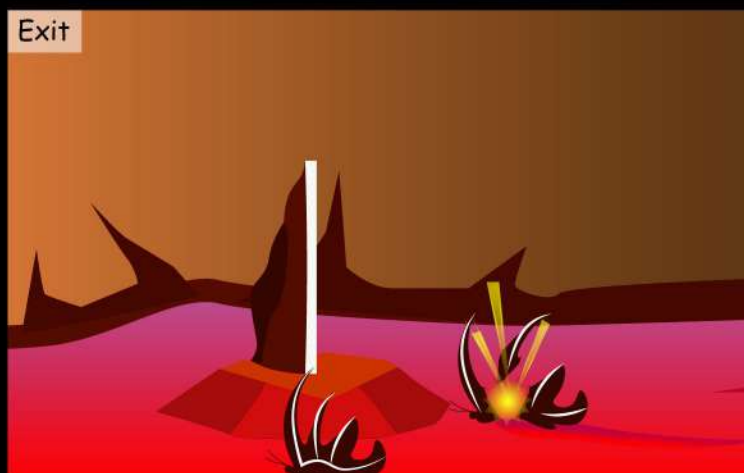

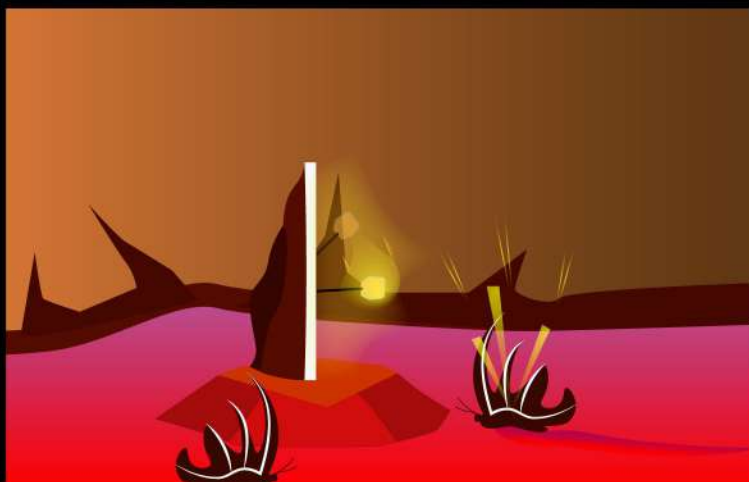

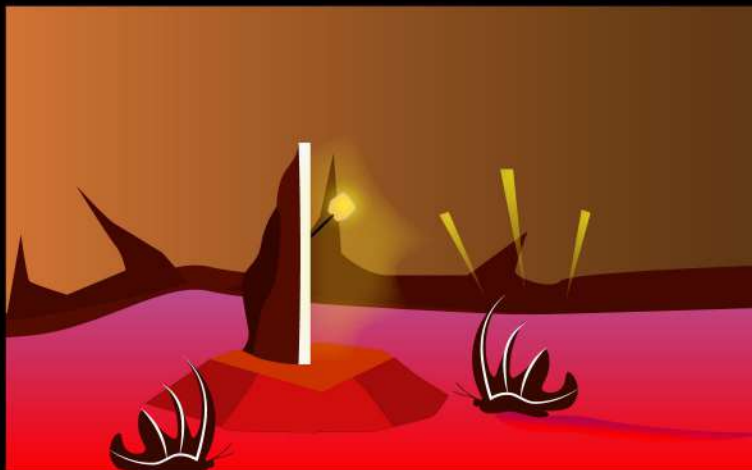

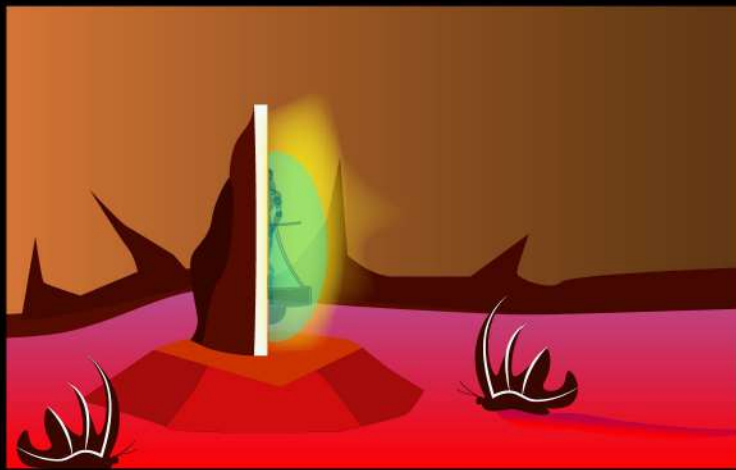

A green one...interesting..

Plant life in abundance

Views

I like the view..Time to go before the bugs get here.

After you.

We were to meet the courier at the set venue

but when we got there it was an ambush by some

freak with a coffin

01:23

It had weird eyes, a tail held a sword as well

Jeez!!

Looks like you are one of the lucky ones.

You know of them?

Yeah.
They are demons

from the realms
of the underworld

And what do they
want with the cargo?

Hard to tell... unless
there's part of info
missing..

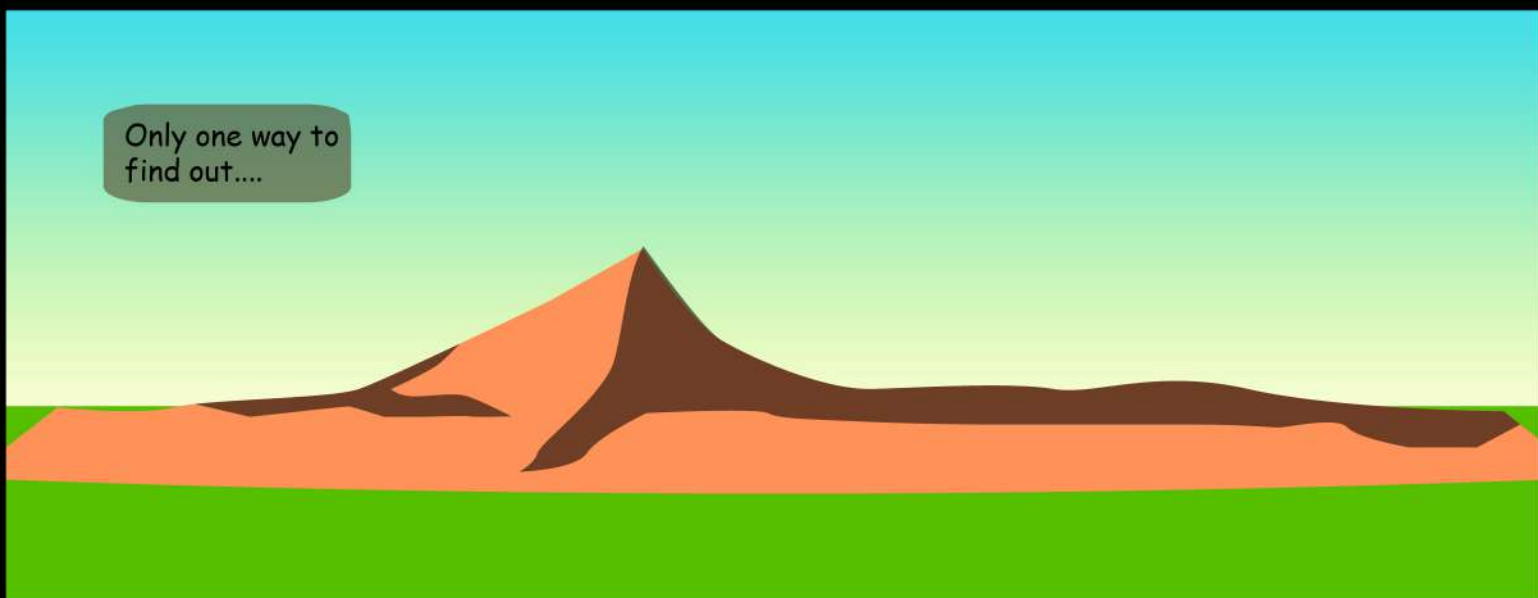

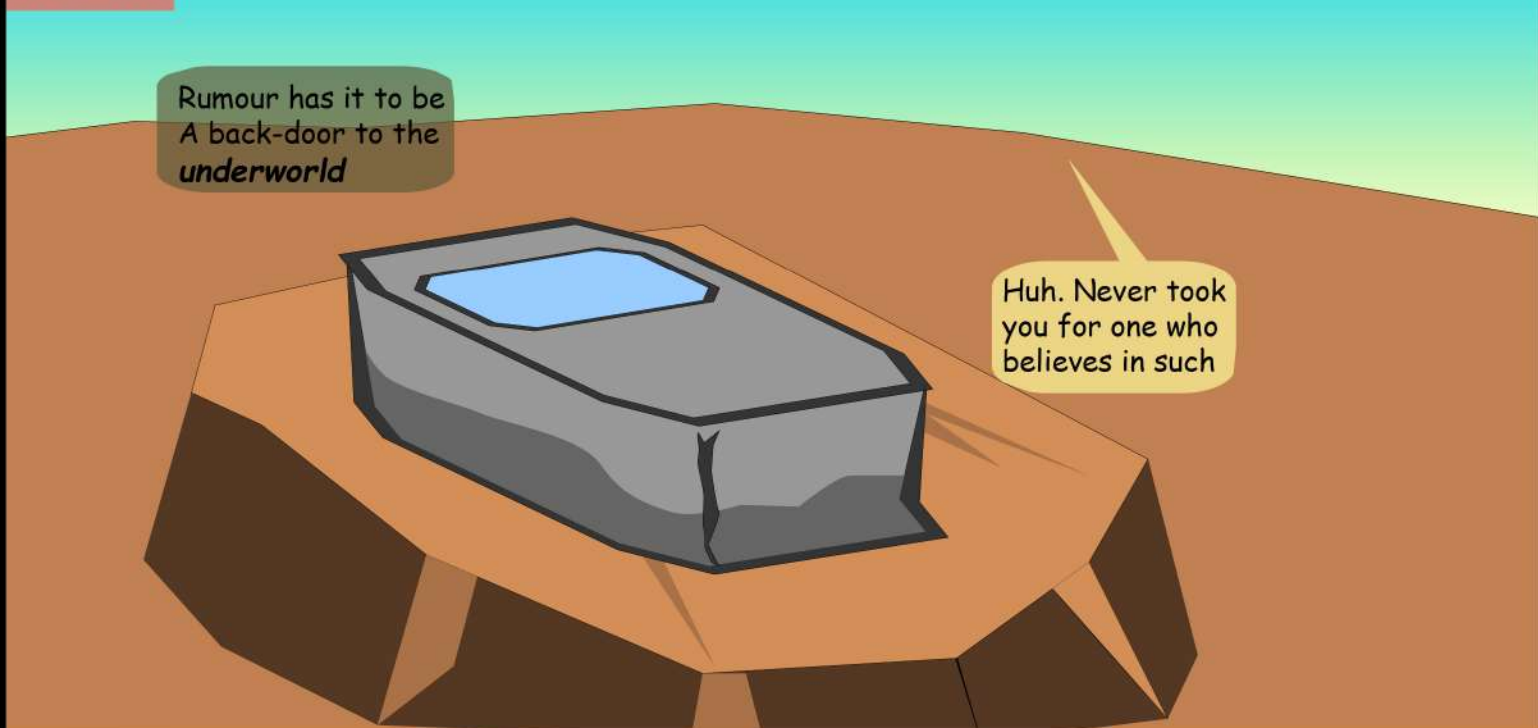

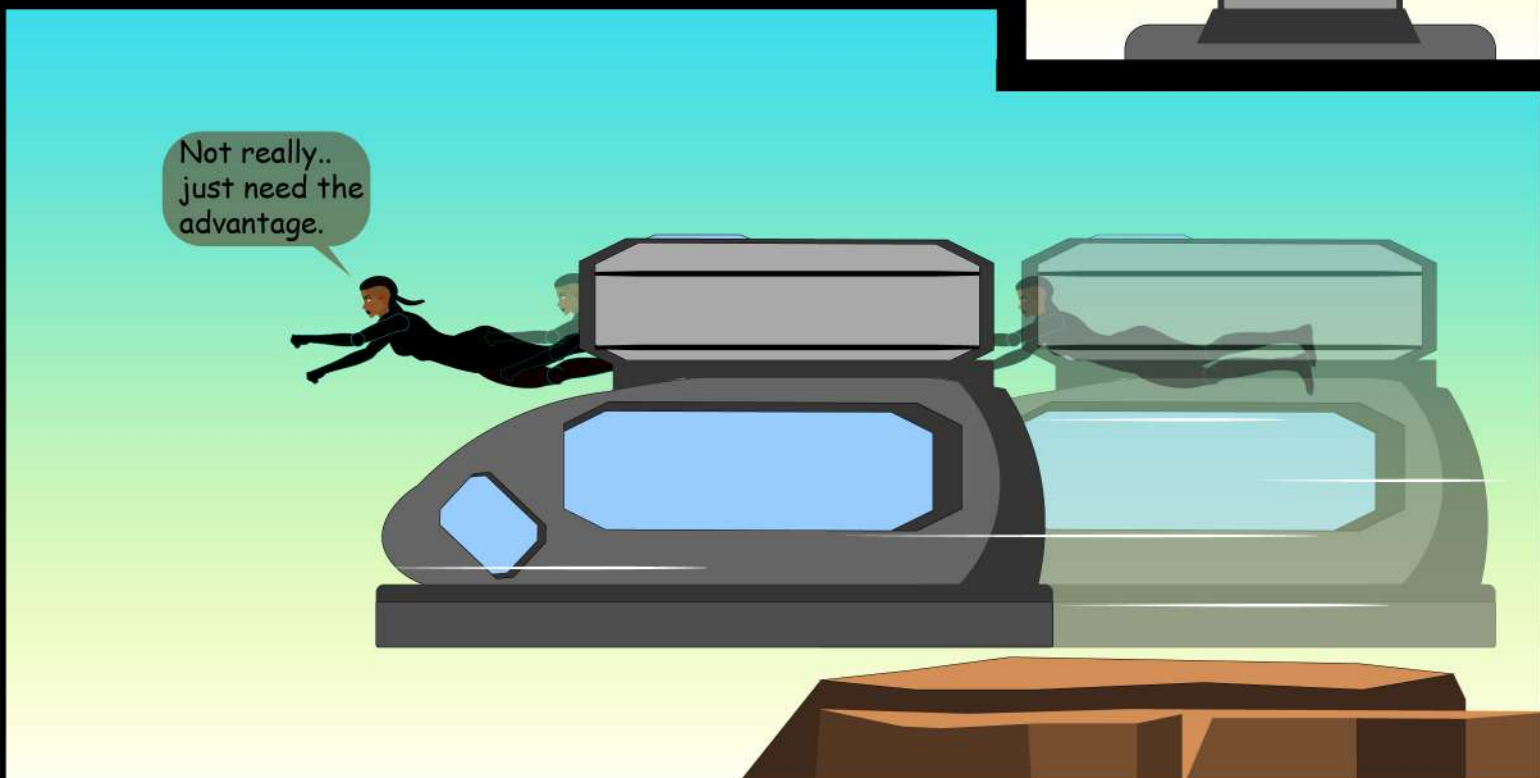

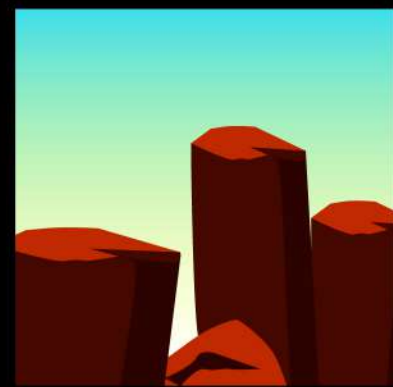

The coffin

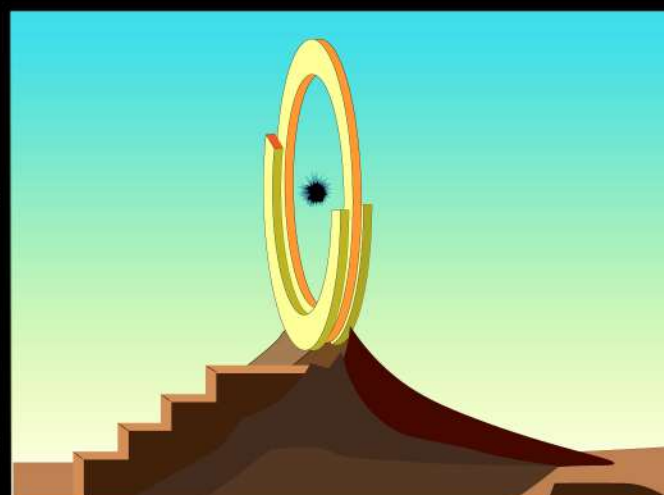

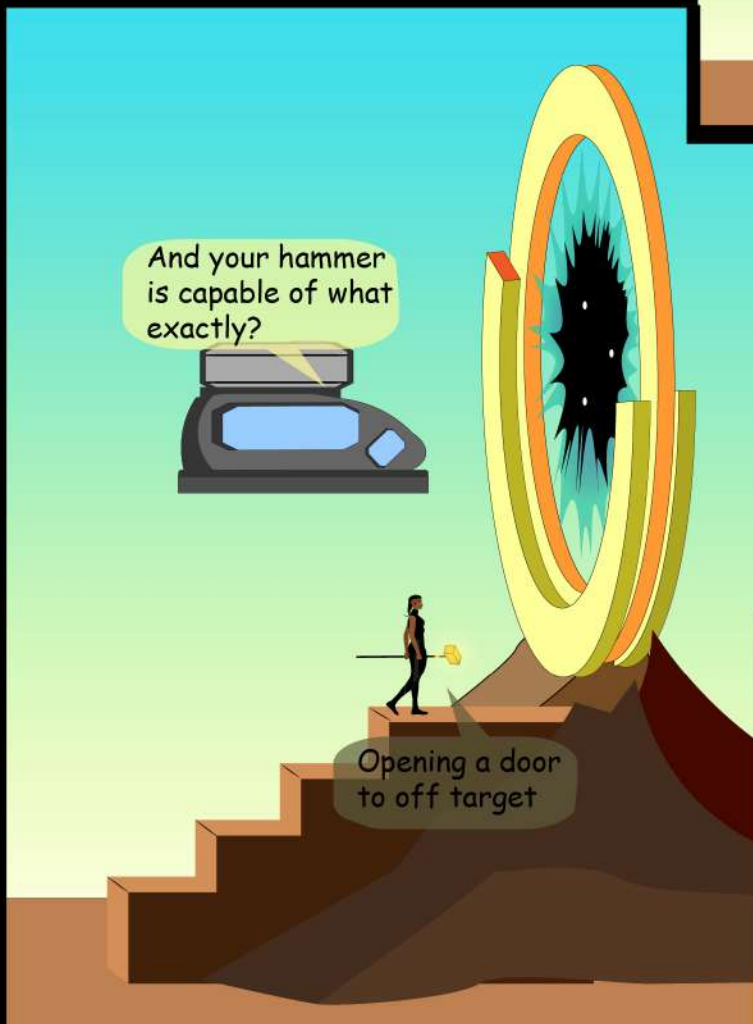

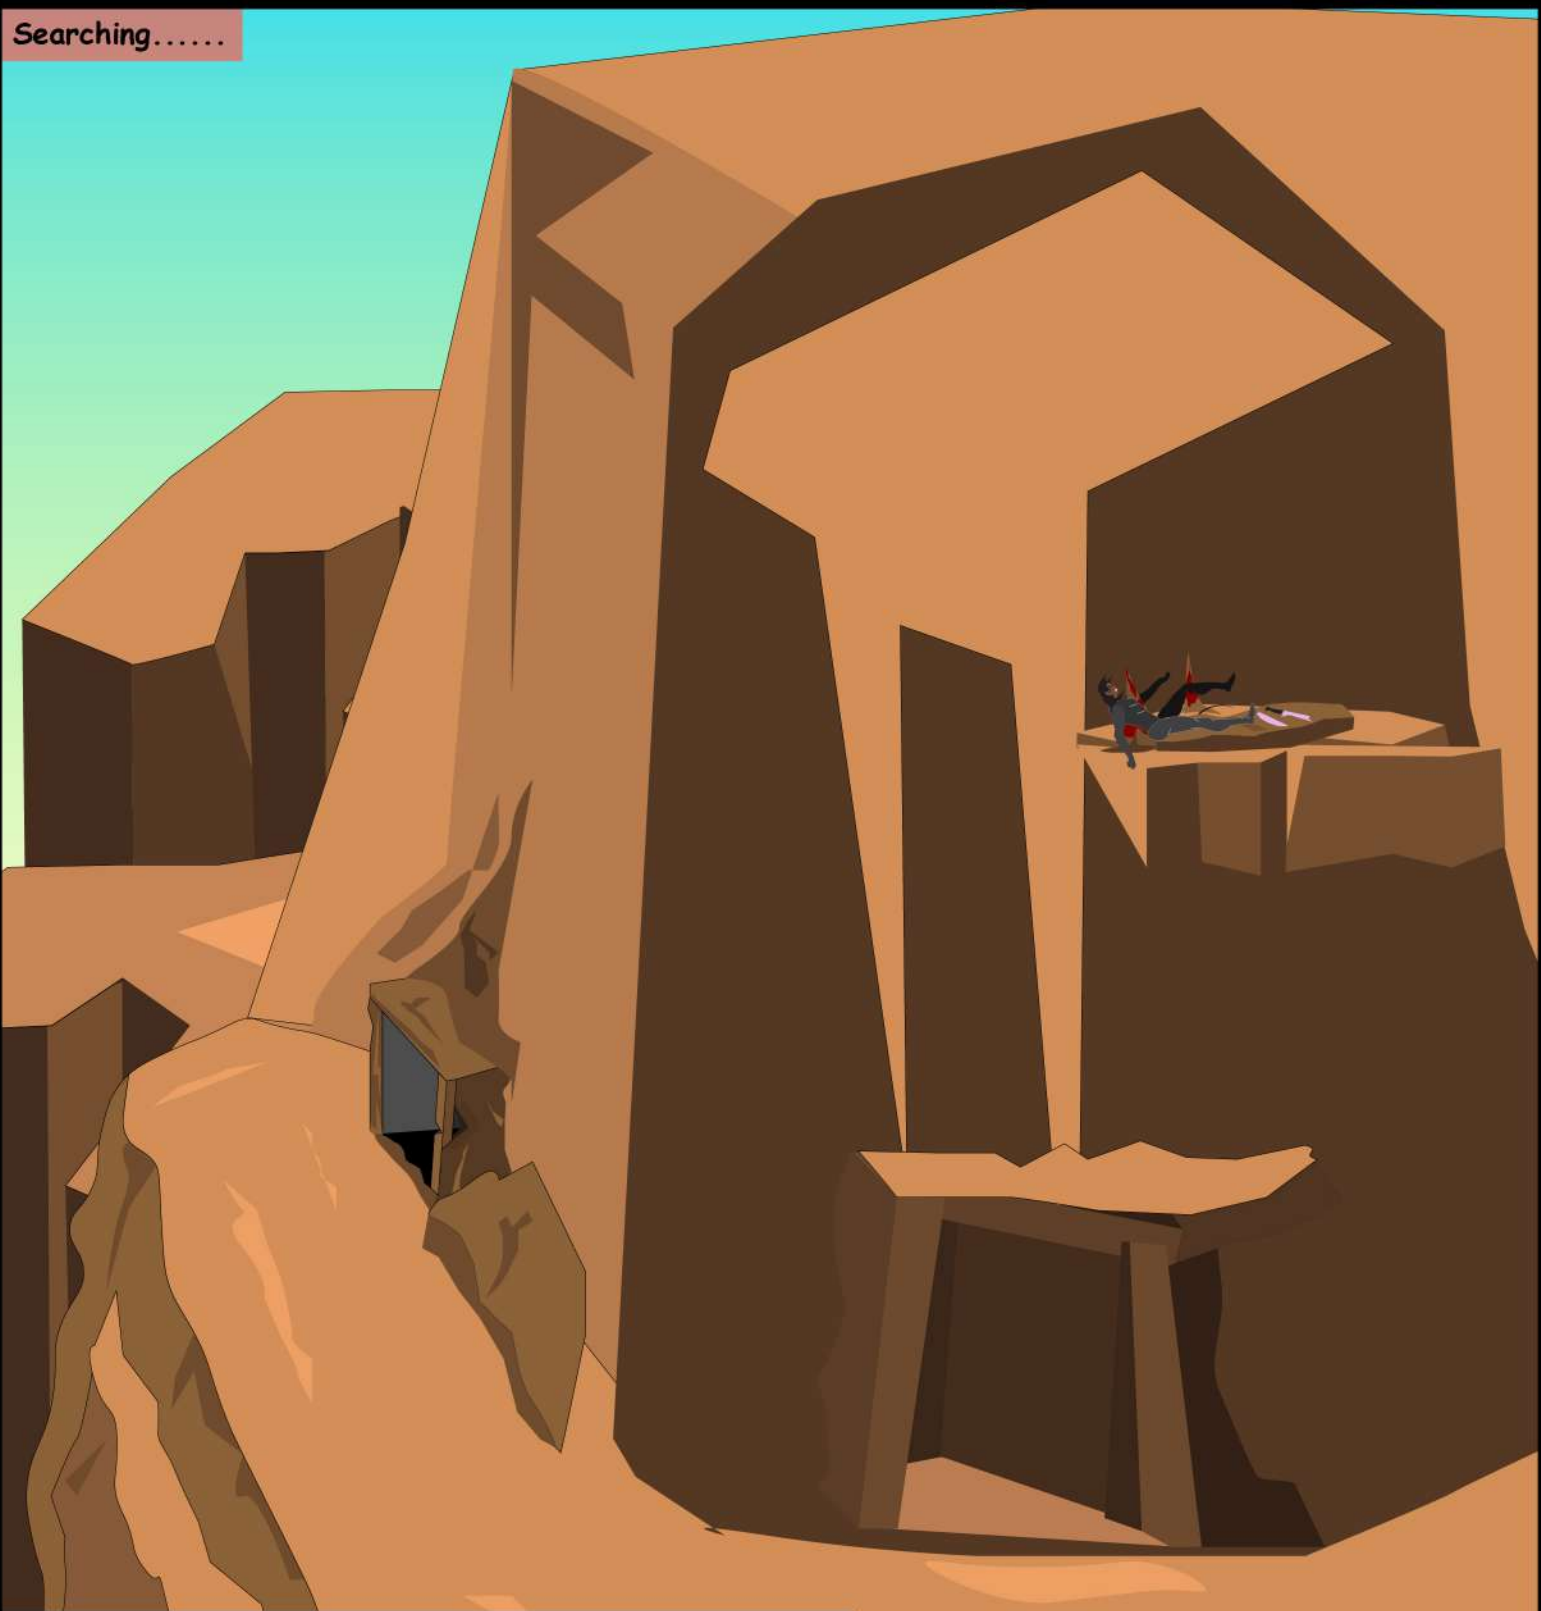

There it is...
..finally..

How you gonna
light it up?

I'll give it a try
with the hammer

Searching.....

OOOoowh
